Our Vision

Inspire confidence with clarity of purpose.

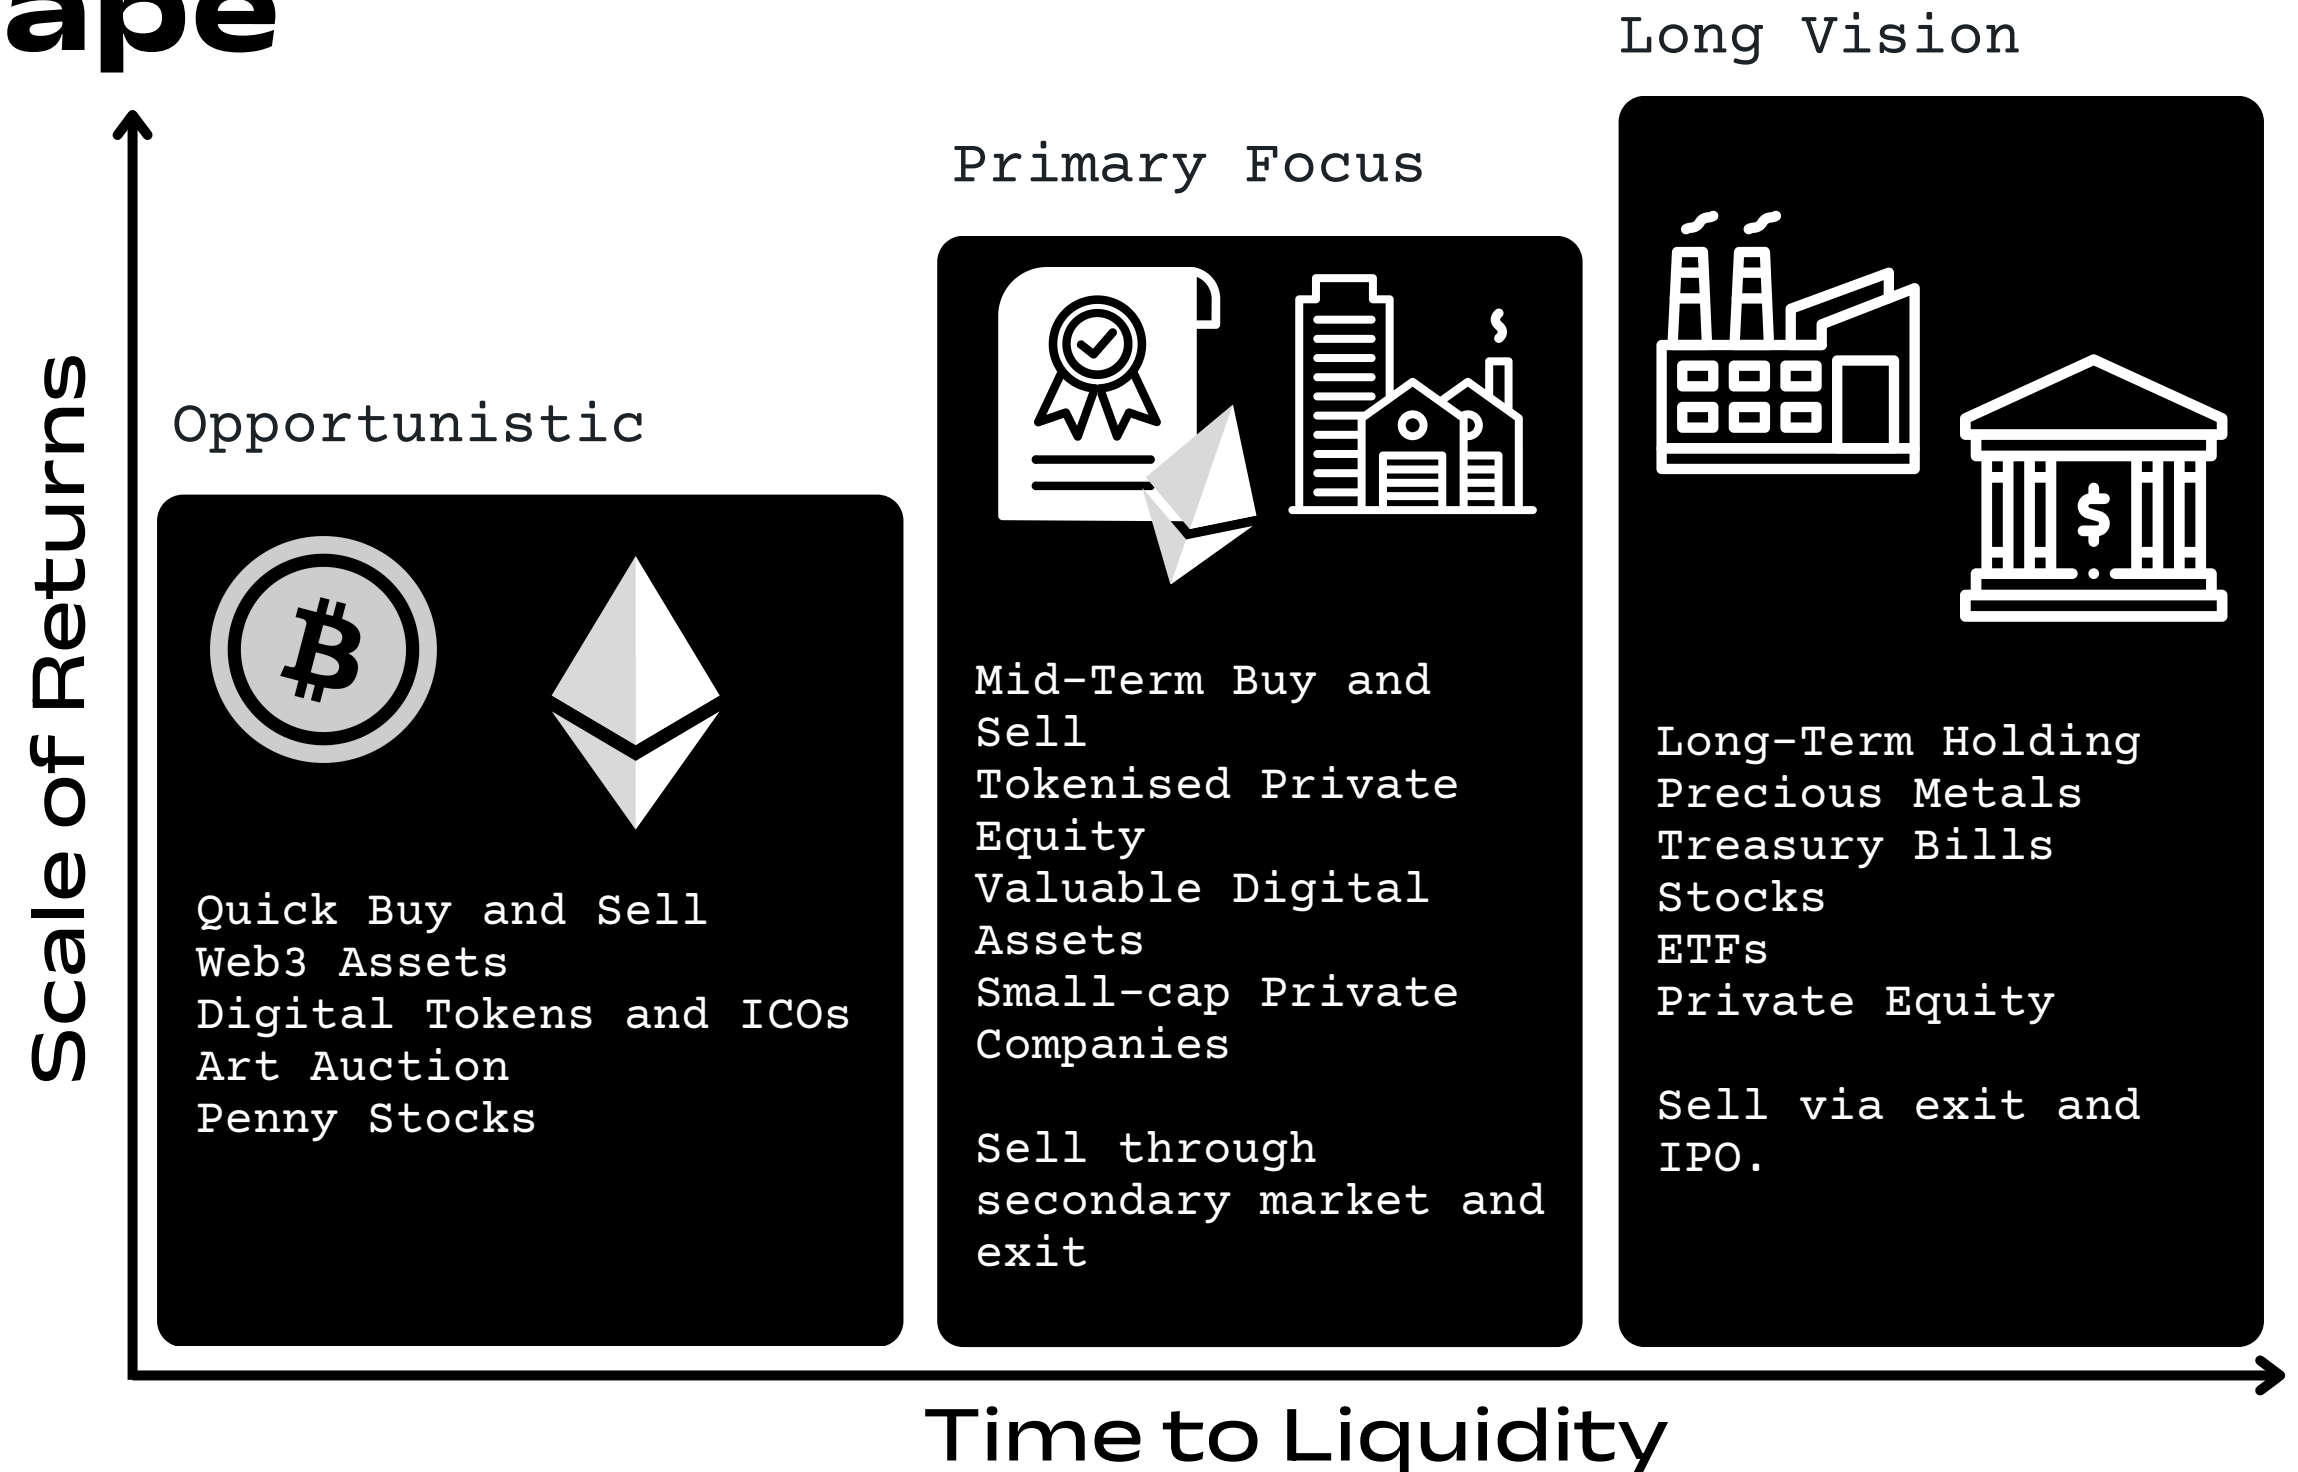

We believe the next decade of unicorns will be built in Indonesia's digital backbone.

We back mission-driven founders building in fintech, digital infrastructure, and B2B services for the 250M+ Indonesian market.

Our goal is to make early-stage venture capital accessible, data-driven, and founder-first.

The Future of the Global South's Venture Building Landscape

We are flexible in where we invest. From commodities to private equity to opportunities in digital assets we want to explore all available avenues for growth.

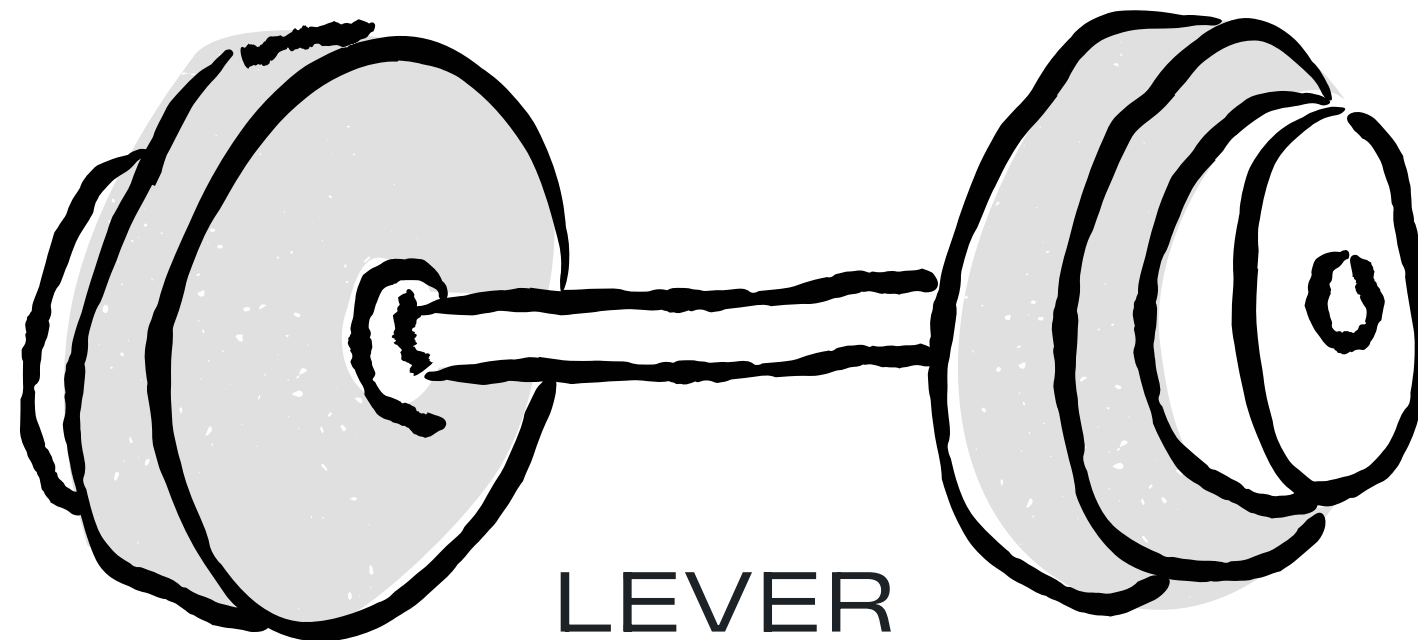

Balancing Big Bets and Opportunities

We are careful with how we manage our finances, always ensuring a readily available liquidity pool of safe assets that can always be accessed whenever needed. This allows us to better lever ourselves in our investments and how we hedge opportunities in the private market to reduce risk and maximize gains. Buying cheap private companies that have growth potential and balancing it with a pool of safe and stable-growth assets is what allows for us to regenerate new fund opportunities for our firm.

SEED

Identify new companies in blue oceans with strong growth potential

LEVER

Balance private market risk with safe public-market and liquid assets and securities for safety

OPPORTUNITY

Invest in marketed growth-stage companies with clear revenue streams and trajectories

Our Vision

Inspire confidence with clarity of purpose.

We believe the next decade of unicorns will be built in Indonesia's digital backbone.

We back mission-driven founders building in fintech, digital infrastructure, and B2B services for the 250M+ Indonesian market.

Our goal is to make early-stage venture capital accessible, data-driven, and founder-first.

The Opportunity

East Indonesia, Africa, Latin America, and much of the Global South is a rapidly expanding window of opportunity for the world.

Indonesia: 4th largest population, fastest-growing digital economy in SEA

VC investment slowed post-2022 – valuation reset = ideal entry point

Founders are underserved at pre-seed/seed – institutional money comes too late

We're filling the “pre-institutional” gap with direct incubation and early capital

Why Us?

Geovest isn't built like other funds. We play where people don't, we look where people aren't. Our method of backing regional investment managers in the form of trusted partners allows for more direct oversight and control over start up journeys. We want to be more present in the founders we back and give them more tools than just capital.

Our campus allows founders to take advantage of physical spaces to support their endeavors - and our expansion in Asia, Africa, and Latin America will do the same. This allows us to serve founders and partners through:

- Proprietary Dealflow: 10-20 startups incubated annually.
- Insider Access: We partner with founders before they reach accelerators or angels.
- Operator DNA: Our partners are ex-founders with real startup-building experience.
- Community-Driven: Embedded in early startup ecosystem through our incubation network.

How Investing with Us Works

Here at Geovest Capital, we don't follow the traditional VC/Private Equity path, instead serving as a Holding Company of special purpose investment entities that pool and allocate venture funds on an annual basis on the complete control of each investors. This means YOU have full control over where your money goes even within the Heritage Fund. We professionally manage the companies under our portfolio intensively as early-stage venture builders.

Funding options range from Leveraged Purchases of Companies, Equity Purchase, Grants, Convertible Loans, etc.

Fund Strategy

Parameter	Description
Fund Size	USD 1M Micro Venture Fund SPV
Ticket Size	\$50K-\$250K initial, with follow-ons
Portfolio Size	20-25 startups
Stage	Pre-seed / Seed
Sectors	B2B, CPG & FMCG, Fintech & Web3, Alternate Investments
Geography	Indonesia + SEA (focus Jakarta, Surabaya, Bandung, Yogyakarta, Bali and Lombok)
Holding Period	5-8 years

Portfolio Construction Model

- The Fund will target 25 startups × avg. \$150K = ~\$3.75M initial deployment
- We will keep a Fund Reserve of 25% for follow-ons
- Management Fees will be structured under a 20% carry, 2% annual management fee
- General Partner commitments will stand at a total of \$50K (from partners)

Fund Goal: 3-5x gross MOIC with 20% IRR over 8 years.

Why Us?
