About Us

We provide cutting-edge integrated solutions tailored for Electronic Design Automation (EDA), Industrial Automation, Industrial PA system, IoT, and Software Development. Elevate your business operations with our comprehensive range of products.

Our services empower businesses to optimize their operations and drive growth. From Electronics Design Automation to Industrial Automation and Software Development, we have the solutions to meet your needs.

We offer state-of-the-art Electronic Design Automation solutions that enhance productivity and streamline workflows.

Solutions:

- **Industrial Automation**

Our Industrial Automation solutions enable businesses to automate processes, improve efficiency, and achieve operational excellence.

- **Industrial Public Address (PA) System**

We specialize in delivering high-performance Industrial Public Address (PA) Systems designed to meet the demanding communication needs of modern industrial environments.

Whether it's a manufacturing plant, power plant, construction site, or processing facility — our PA systems ensure clear, reliable, and zone-specific communication for daily operations, announcements, and emergency alerts.

- **IoT Solutions**

With our IoT solutions, businesses can connect devices, gather data, and gain valuable insights for informed decision-making.

- **Software Development**

We provide end-to-end software development services, from ideation to deployment, to help businesses build innovative and robust solutions.

- **Wired Network Solutions**

Dive into a world of robust, high-speed connections. Discover a range of wired networking solutions tailored to meet the demands of modern industries. From Ethernet to Fiber-optic technologies, we have you covered.

- **Wireless Network Solutions**

Unleash the power of wireless connectivity. Our advanced wireless solutions empower your machines to communicate effortlessly, whether in a local network or across vast distances. Explore Wi-Fi, Bluetooth, LoRa and cutting-edge IoT connectivity options.

- **AI Solutions**: Developing intelligent, data-driven systems to enhance decision-making and automation using artificial intelligence.

Our Product List:

- Industrial Wireless Solutions
- Weighing Solutions
- DI-DO Cards
- Power Supply
- Media Convertors
- Wireless DI-DO
- AI Solutions
- Voice Alarm
- Hooter
- Flasher
- LED Display
- Bag Counting Solutions
- Software Solutions.

Our Client List:

- Bajaj Steel
- Solar Explosives

Warm Regards,
Mr. Dheeraj Chumble
