Egypt's Unique Value Proposition

Egypt offers advantages including proximity & low-cost to end markets and a basket of beneficial trade agreements

Proximity to End Markets

- Egypt's location allows a **competitive lead time** on shipments and relatively **low transportation costs**
- Close proximity to end markets enables us to **respond quickly** to seasonal shifts in demand and changes in consumer tastes

Low Cost Environment

- Egypt offers a **sizeable young labor force**, with over 50% of the population under the age of 30, at a relatively low cost compared to other emerging markets that operate in the labor-intensive Apparel & Tailoring segment
- Costs of inputs for **infrastructure** and **utilities** are among the least expensive in the region

Preferential Trade Agreements

- A number of preferential trade agreements — including agreements with the United States, the European Union, COMESA, Turkey and the GCC countries — position Egypt **as a prominent hub for export-oriented companies**

Gov't Incentive Programs

- The government maintains the long encouraged export activity through offering **incentives programs** in support of **export-oriented manufacturers**.
- Egypt's free zones offer **tax incentives to export-oriented manufacturers**; Karnak Garments manufacturing facility in Ismailia free zone area allow it to benefit from these incentives.

CHAIRMAN MESSAGE

As a clothing manufacture company, we provide a full range of solutions to cover and meet customer expectations. Personally, I think every customer has unique specifications, so our ideal team recognizes each customer's specific challenges, needs and goals.

Our company makes the event and makes a positive difference in the development of companies by providing Innovative solutions that enable them to achieve their goals.

Integrity is an obligation that must guide our behaviors beyond more compliance with the law and regulation, and lead us to the right choice when faced with any situation.

We'll continue to develop staff through training and support in higher education and academic achievements. Our human capital was and remains the most important element when it comes to challenges and difficulties.

Let us not forget that the mandate of competent managers and customer feedback enables us to save time and effort when it comes to bureaucratic procedures and systems.

The best way to appreciate and develop diverse talent, initiative and leadership among our employees will be by investing in their skills.

WHY KARNAK GARMENTS

- DUTY FREE TO U.S.A – UNDER “Q.I.Z” AGREEMENT.
- DUTY FREE TO EUROPE – WITH “EUR1-”
- DUTY FREE TO AFRICA – UNDER “COMESA” AGREEMENT
- The Geographical location of Egypt is also a benefit to the Export and Import Market, it allows very short leads by sea to important buying destinations.

VISION & MISSION

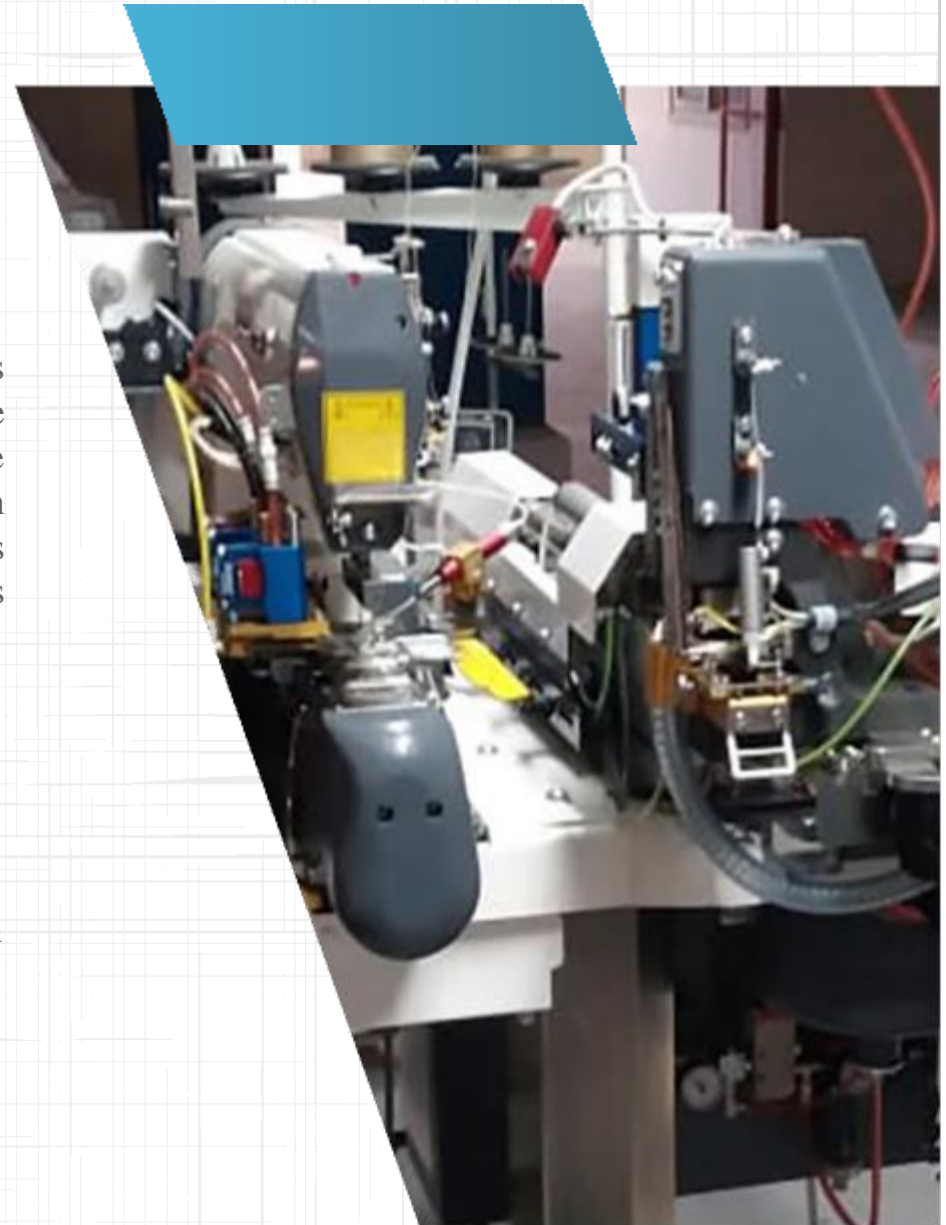

Mission

We seek to produce high-quality products to be exported to USA and Europe, and we also have a team dedicated to producing the finest products at specific times so we can gain customer's satisfaction. One of our goals is to produce the best, so that our company is considered the best in the region.

Vision

Our Company is in the most competitive trying to be one of the most prosperous in

PRODUCTION STAGES

Design

The facility has a specialized R&D department, responsible for advancing the already existing products, and furtherly developing new styles adhering to the global market. The department is flexible to enhance several modifications based on the customer's desires through its devastated research to gather the needed data for the product development. Thereby, the facility seeks to produce the trendiest designs with high qualities of all types of garments, at competitive prices that match both genders at all age ranges.

Planning

An incorporated department that coordinates all the production procedures, including the time frame needed for production, the usage of the fabrics, and the packing list of the final goods for the shipment. The department coherently coordinates between the different departments to set the initial layout of production, the coordination plan embraces all the involved production departments, starting from the cutting department to the small parts, moving along the assembling section. Thereby, the planers forward the washing approved samples to the laundry for the request quantities. And lastly, the department monitors and moderates the packing sections to implement all the assigned accessories and packing requirements for the final products before shipment approved dates.

Merchandising Department

Specialized workers assigned to determine fabric consumption and trims needed for the product, the department adheres to the clients demands and inquires through developing initial samples all the way to the pre-production samples, based on client's requests and modifications. The department settles delivery dates based on the plan requested, and the quantities demanded. After reaching a point of equilibrium between both of the facility and the client, the merchandising officers forward the pre productions samples to the production stage.

Pattern Making

Assigned designers approve the final style of the commodity through a chain of decisions passed from the previous departments using computerized system for pattern & markers.

Sampling

The facility has a specialized sampling room that coherently flows with the client's preferences for the requested designs and specs. In further development, the clients have the legitimacy of making the final approvals of the invented samples before initiating production. The sampling department forwards the approved pre-production samples to start the production of the requested quantities.

CUTTING SECTION

Cutting

our cutting facility is equipped with top of the line's equipment that provides the top quality for our customers, with an automatic spreader and 4 manual cutters, our cutting capacity could reach up to 10k pcs per day.

Quality assurance

Set of powerful managerial tools with proactive strategies that establish a good quality management system and sustain a desired level of quality.

Quality control

A specialized quality control team use reactive strategies with powerful corrective tools for detection of defects after the product is produced and before its release .

Compliance AND SEAFTY

Our Company has a specialized compliance team that ensures to produce a secured environment, implementing all the health and safety measures to ensure optimum safety of its employees. The compliance team works to achieve greatest benefits for workers. The team complements its audits schedule with plans for improvements and training programs to fully assure a highly complied level in respect to the facility's code of conduct. Specific programs are designed in the areas of health and safety, workers participation, training and awareness, living wage, and empowerment of women. The team aims to empower workers so together they could create a sustainable work place where Human Rights are respected and promoted.

Health and Safety

Our officers make sure daily that all exits are observed and evacuated in case of any emergency. Also, they assure on the quality and work of the fire extinguishers along with the allocated pharmacy boxes at all the production halls. Employees are asked to wear the needed personal protection equipment to eliminate any threats. All work force complains are tackled and investigated to improve the quality of the company's public sphere and demolish any kind of sexual orientation or physical abuse.

SUSTAINABILITY STRATEGIES

Reducing Chemical Impact

- we focused on finding sources for alternative chemicals
- Investing in the latest technology for chemical management
- industrial waste water to treated before proceeding into the drainage.
- Safe disposal of Hazardous Materials

Improving Water Management

- operating a recycling unit to treat the industrial waste water before going into the industrial drain.

Improving Energy Management

- we have developed an energy savings producer that allows us to minimize our usage of electricity and natural gas yet allow form production to increase.
- Using hydrotherapic processes, we have also saved up to 30% of electricity entering the station.
- we use only light bulbs with energy saving led sources.

Reduction of Material waste

- Company has an environmental agreement with Recycling companies that collect the material wastes and recycle in ECO friendly methods.
- Materials include Cartons – cones – fabric cut waste – plastic substances

Sustainable Raw Material Sourcing

- Company gives the priority in Production for the Organic or Recycled fibers.

Water treatment

we established a wastewater treatment plant that allows us to treat with textile laundry wastewater, which is always an issue in our region.

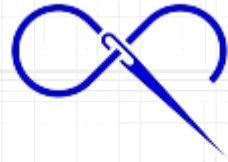

The scarcity of natural water resources needs to be addressed and water reuse is imperative. As we increase ZDHC gateway activates we publish ZDHC WW test results every 6 months.

Staying up to date with the best practices, we plan to develop our water treatment capabilities into water recycling.

Furthermore, during the washing process steam is regained and reused.

we have invested in environmentally friendly technology to further develop alternative solutions by using laser technology we have had savings up to 100% in chemical and water use in the dry processing, washing effect, and permanganate spray processes.
