## "J" Series Hitch

The STOESS "J" SERIES is a family of field tested, rugged, yet economical hitches designed for center drive rod weeders, drills, harrows, discs and more. Eleven sizes from 18' to 88' can accommodate virtually

all combinations of equipment for any size job. "Crabbing" on hills is minimized with a short tongue-to-width ratio. The "J" series hitches have also been adapted into ground sprayers.

### Standard Features

- Primarily constructed from 2½ inch square steel tubing.
- Detachable spindle and hub assemblies with 2500 lb. ratings.
- 15 x 5 wheels.

### Optional Features

- Pull brackets for center drive rod weeders.
- Pull brackets for IH 150 drills.
- Castor brackets for outside wheels of 5-section hitches.
- Custom pull brackets on request.
- 760 x 15 6-ply rib implement tires.

Model	Width	Sections	Hub & Wheels
