TIC100

Transportable *Implement Cart*

THE **TIC100** IS A *HEAVY DUTY* CART WHICH FOLDS UP FOR TRANSPORT.
IT'S SIMPLE BUT RUGGED DESIGN ALLOWS GREAT VERSATILITY.

The center section is made of 6x4 x 1/4 and 5 x 3 x 3/16 rectangular tube.

The wings are constructed of 6x6 x 3/16 wall for harrows and 1/4" wall for most other operations.

Standard Features:

- *Hydraulic dual wing wheels* are located inward from the end of the wing for better contour following with the center of gravity directly over these wheels in transport position.
- *Spindles and hubs* are bolted on for easy replacement. Tandem duals are easily added on the center section.
- *Heavy hinge design* allows extreme short turning ability in transport position. Hinge pins are greasable for longer life.
- The *pull eye is adjustable* to keep unit level.
- *Price includes* all fasteners, tires, hydraulics, and tongue jack.

Used for:

Center drive rod weeders
Drag harrow
Tine harrow
Springtooth harrow
Ground sprayer
Incorporation of granular herbicides
Packers

Optional Features:

- Telescoping tubular wing braces instead of cables can be used when traveling downhill with no drag of equipment. (i.e. spraying or dead heading.)
- Center section tandem duals can be added for carrying a tank on the center section.
- Raised cable brackets used with either cables or telescoping braces for clearance in rough ground or terraces.
