

Manufacturing, Inc.
TIC80

Transportable *Implement* Cart

THE *TIC80 IS A *HEAVY DUTY* HARROW CART WHICH FOLDS UP FOR TRANSPORT.
ITS SIMPLE BUT RUGGED DESIGN ALLOWS GREAT VERSATILITY.

The center section is made of 6x4 x 1/4 and 5 x 3 x 3/16 rectangular tube.

The wings are constructed of 5x5 x 3/16 square tube.

Standard Features:

- *Wing wheels* are located inward from the end of the wing for better contour following.
- Wing wheels are available either as hydraulic or automatic.
- *Spindles and hubs* are bolted on for easy replacement.
- *Heavy hinge design* allows extreme short turning ability in transport position. Hinge pins are greasable for longer life.
- The *pull eye* is *adustable* to keep unit level.

* Pictured above is a TIC100 which looks similar to the TIC80.

Used for:

Drag harrow
Tine harrow
Springtooth harrow
Ground sprayer
Incorporation of granular herbicides

Optional Features:

- Telescoping tubular wing braces instead of cables can be used when traveling downhill with no drag of equipment. (i.e. spraying or dead heading.)
- Center section duals and tandem duals can be added for carrying a tank on the center section.
- Raised cable brackets used with either cables or telescoping braces for clearance in rough ground or terraces.
