MORE THAN CLEAN BY VISION

Vision's More Than Clean linen programme, offers a complete range of antimicrobial treated textiles.

For over two years, Vision has been trialling and testing an innovative antimicrobial technology, which is added to pillows and duvets at the point of manufacture. The product efficacy has now been tested for the commercial environment, lasting for more than fifty washes, along with ISO 9001: 2008 accreditation, Oeko-Tex® Standard 100 certified (Classes I, II, III, IV), Biocidal Products Regulation (BPR) approval and independently tested by SGS, Aston University and the University of Leicester.

Bed and bath linen which have this effective and long-lasting antimicrobial technology applied have been proven to help protect against the spread of Coronavirus, killing more than 80% than untreated textiles and has up to 99.99% efficacy against harmful pathogens including E-coli, Legionella, Aspergillus, Niger (mould), Odour-Causing Bacteria, Listeria, MRSA, and Salmonella.

All Vision filled bed linen is now produced with the antimicrobial treatment applied. This can also be applied to any of Vision's flat bed linen and bath linen.
