

AMFICO COATINGS INDIA

INTRODUCTION

Amfico Agencies Pvt Ltd has been in the business of bulk liquid logistics for over two decades. It has created a niche for itself by catering to the needs of MNCs and Local Conglomerates across the globe and in India who are opting for bulk liquid logistics in tank containers for international and domestic use.

Amfico has been successful in being an All-India Representative of prestigious International Companies offering them business solutions for a smooth entry into the lucrative Indian market. We have created first mover advantage in representing international partners and principals across the liquid logistics sector within India.

As part of our many verticals, Amfico has developed one of its kind depot in Nhava Sheva fondly known as ALL HUB- Amfico Liquid Logistic Hub.

At ALL HUB Amfico has developed its own coating facility that is dedicated to coating Tankcontainers, Road Tankers, Metallic IBC's Bulk Chemical Storage Tanks, Process Reactors and Scrubber Columns etc. The objective is to offer a wide range of the finest solutions for anti corrosive paints in the Indian market attuned to individual applications.

ASSOCIATION

Amfico is one of the select few facilities in the world to be certified as applicators for Advanced Polymer Coatings (APC) - manufacturers of ChemLINE® 784, ChemLINE® 784 ES & ChemLINE® 2400 which are the linings of choice when it comes to transportation of a range of highly corrosive cargoes in tank containers. Our team has been trained by APC and we have successfully coated a number of tanks with these linings. The facility at ALL HUB has state-of-the-art equipment to handle complicated coating procedures. Amfico's Chemline coating ensures purity of tank lining and helps reduce maintenance and inspection intervals therefore maximizing performance to carry cargoes.

PRODUCT HIGHLIGHTS

These are high functionality, two component thermoset polymer coatings. When cured, their high cross-link density is unlike other coatings.

They deliver significantly improved product performance and anti-corrosion resistance & is formulated with a unique polymer designed and engineered with high functionality.

Key Features:

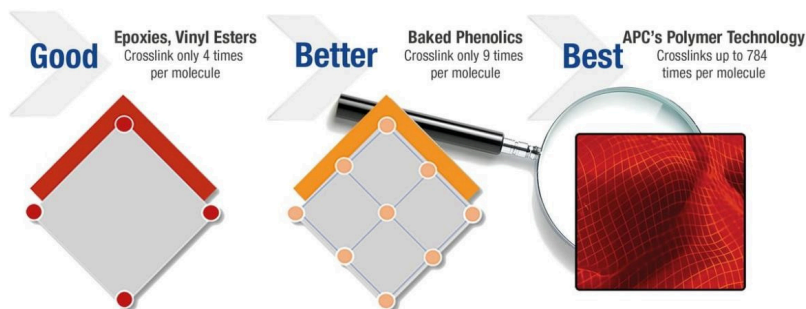

- Higher heat resistance as well as resistance to abrasion
 1. Provides Superior Chemical Resistance to:
 2. 98% Sulfuric Acid
 3. 50% Sodium Hydroxide
 4. Most acids, alkalies, and solvents
 5. Methanol
 6. Methylene Chloride
 7. Glacial Acetic Acid
- Superior corrosion resistance, exceptional toughness
- Superior bonding qualities
- Applied to pitted and/or corroded steel
- Maximum versatility; product cycling
- Ambient or lower temperature forced air cure
- Very low VOC - 130 grams/L (1.09 lbs. per gallon)
- Virtually non-permeable, steam cleanable, & field repairable
- Resists hydroblasting
- Excellent UV resistance
- Complies with all FDA regulations

Amfico has lined a large number of tank containers for various tank operators & chemical manufacturers. Some of the prominent cargoes carried in these lined tanks are.

CAC, TCAC, THYONIL CHLORIDE, OXALYL CHLORIDE, PIVALOYL CHLORIDE, ISO BUTYRYL CHLORIDE, NEODECANOYL CHLORIDE, 2-ETHYLHEXANOYL CHLORIDE, HEXACHLOROACETONE, MCA, PHOSPHORUS TRICHLORIDE, SULPHUR PIT, BENZOYL CHLORIDE, BENZYL CHLORIDE

PATENTED POLYMER TECHNOLOGY
