## TECHNICAL SKILLS

### Languages

JavaScript, Typescript, HTML, CSS, Apex, SQL

### Backend

Node.js, Express.js, Postgres, Supabase, Git, SFDX

### Testing

Jest, Supertest

### Hosting

Netlify, Render, Cloudflare

### Frontend

React/Native, Expo, Figma

### Soft Skills

Paired programming, technical communication, Agile and SCRUM methodologies

## EDUCATION

**VISION GRAPHICS & GAMES DESIGN CERT. H.E.**  
Aberystwyth University

## INTERESTS

- As the founder of TopSpin Table Tennis Club in South Manchester, I've spent over 10 years nurturing a community of table tennis enthusiasts.
- I enjoy running, photography, board games and all things sci-fi.
- The most recent book I read was 'Feeling and Knowing: Making Minds Conscious.'

Since first being introduced to Visual Basic in an after-school computing club, my passion for technology has guided me through diverse roles in IT, media, marketing, and e-commerce providing experience that gives me valuable insight into business processes and user needs. After completing an intensive software engineering course, I transitioned into development and have since been crafting various solutions across multiple tech-stacks and honing my problem-solving skills. With this unique blend of business understanding, technical foundation, and drive to continuously learn, I'm eager to join a team where I can create impactful solutions and grow as a developer.

### Junior Salesforce Developer

#### Peninsula Business Group

AUG 2024 - PRESENT

- Working in a fast paced environment across multiple orgs to develop custom Salesforce applications using Lightning Web Components and APEX.
- I developed a custom solution to integrate a new e-signing service into our sales process, which will reduce expenditure by millions across the group.
- Assisted the rollout and adoption of the new e-signing solution via a managed package, across multiple companies.
- Implemented multiple automated processes to integrate new data sources, enhancing lead generation and expanding opportunities for the sales team.

### Trainee Full-Stack Software Engineer

#### Northcoders

MAR 2024 - JUN 2024

- Built a robust understanding of software development using JavaScript in Node.js environment.
- Gained a firm grasp of fundamentals such as object-oriented and functional programming, closure, recursion, and asynchronous code.
- Completed katas and sprints throughout the course using a test-driven approach.
- Improved my technical communication through paired-programming.
- Learned how to create and seed a database with PostgreSQL.
- Built RESTful APIs in Express using the MVC pattern.
- Used React to build a number of front end mini-apps. Placing an emphasis on accessibility and user experience.

#### Full-Stack Projects

- 1 Newsly is blog style news site developed and deployed to Netlify. The front end is designed in React and communicates with a RESTful API built with Express.js and Postgres. View the live website [↗](#) or explore the repo on GitHub. [↗](#)
- 2 DogGo is mobile app designed to help dog owners when planning a trip. It was developed collaboratively with a team of five using React Native, Expo and Supabase. Guided my agile methodologies. See a demo [↗](#) or view the code. [↗](#)

### Digital Marketing & E-Commerce Manager

#### Freelance

DEC 2016 - MAR 2024

- Developed multiple e-commerce stores for clients as part of a comprehensive digital marketing package.
- Managed setup and branding of stores, including concept development and product listing.
- Created and executed digital marketing campaigns across major PPC platforms.
- Leveraged advanced audience targeting and copywriting skills to drive sales and enhance brand visibility and engagement.

### Digital & Marketing Coordinator

#### Addiction Dependency Solutions

OCT 2015 - OCT 2016

- I Led the organization's digital agenda, collaborating across departments to implement service-specific digital strategies.
- Utilised digital technology and media for effective promotion of services and enhanced client engagement.
- Provided digital-related advice during tendering process for new services.
- Coordinated and streamlined production and ordering of marketing materials.
