

# RADU AXINTE

TEACHES  
DIGITAL SKETCHING and Ai

## About **Radu Axinte**

Radu Axinte's passion for art and technology naturally led him to a career in architecture. He is a senior architect at Heatherwick Studio in London, and serves as a Digital Sketching instructor at Techy Sketching.

With his expertise as a talented digital sketch artist, he has shared his skills with some of the world's most prominent design and engineering companies, helping professionals enhance their design communication and visual storytelling.

# OVERVIEW:

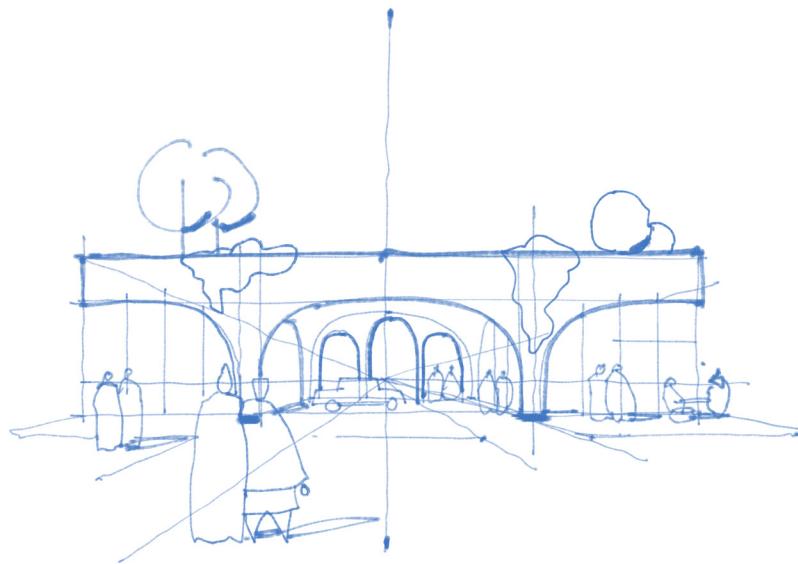

## The Course.

The **SKETCHING OUT LOUD** courses are tailored to enhance your design skills and improve communication through effective techniques.

Each session delves into essential digital sketching methods and workflows that incorporate AI, making the design process more dynamic and enjoyable.

You'll be encouraged to engage with classmates, discussing course elements and sharing insights from your training.

Additionally, you can connect with peers and join the conversation online through social media

## Prerequisites:

To get the most out of this course, you should already be comfortable with digital sketching techniques, including working with external references and layers.

You'll also need a digital sketching device with a stylus similar to those listed below.

surface or tablet  
second best

ipad  
reccomended

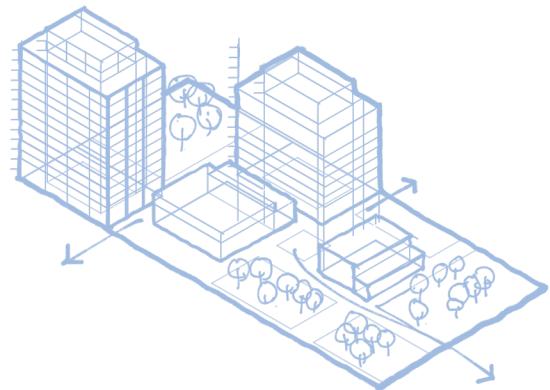

Laptop +  
sketch pad  
OK'ish

# THE COURSES

## About this workbook

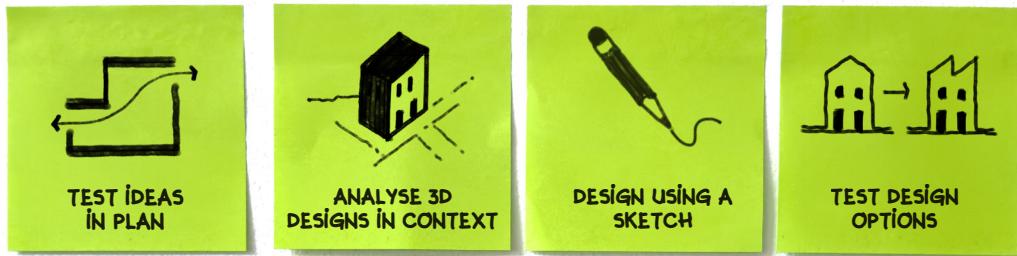

The **TECHY SKETCHING** team has prepared this introductory guide to help course participants get ready for the sessions and make the most of each learning experience.

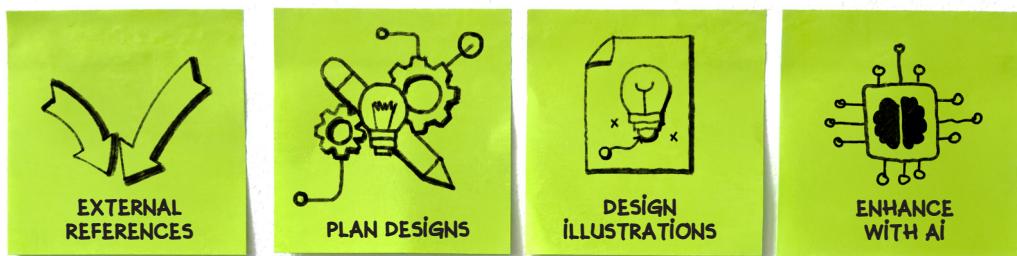

## Course structure

The course covers everything from the fundamentals of digital sketching to using sketches and AI tools for visualizing and refining designs.

The learning modules explore four unique use cases, including plan diagrams, satellite views, initiating designs from base references, and making adjustments to existing designs.

Each learning session is organized into four straightforward steps: importing an external reference, sketching and planning designs, creating design illustrations, and enhancing them with AI.

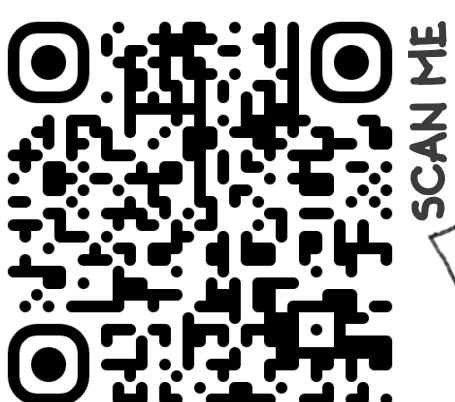

# INTRODUCTION

Let's get underway:

Use the link below or scan the QR code to install the **Concepts App** and the extended trial.

# SETTING UP

The Concepts App + Sign in  
follow the step by step guide

Activate your account

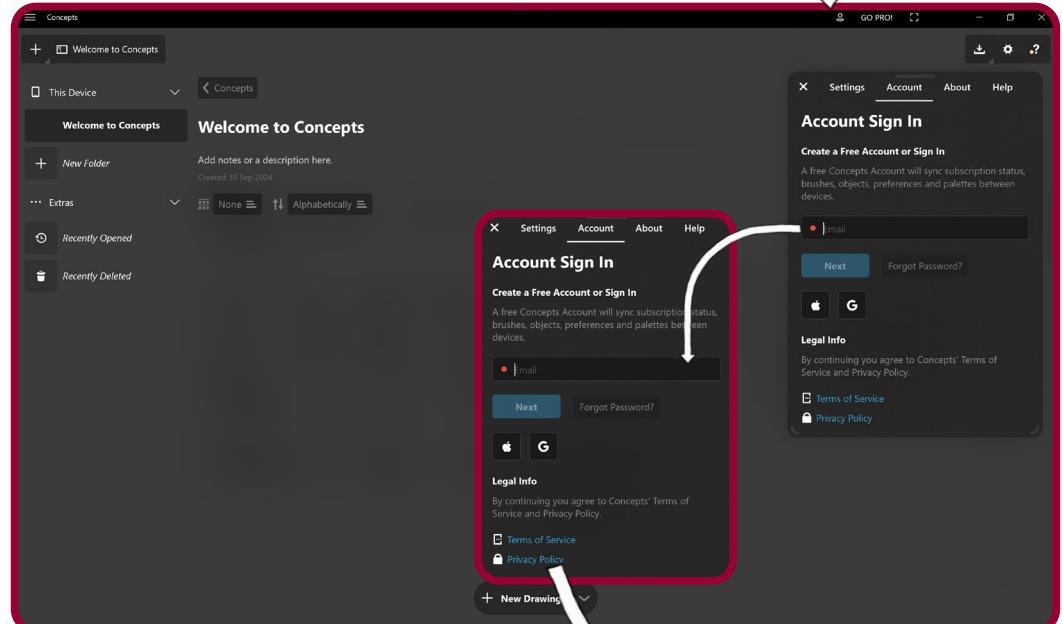

A screenshot of the Concepts app activation page. The page features a dark background with a central text area. At the top, it says "A SPECIAL OFFER FROM TECHY SKETCHING" and "Almost Done!". Below this, it says "We've sent you an email to confirm your account. Your free trial will activate once that's done." and "Once installed, you'll need to [sign in to the app](#) to unlock everything." A call-to-action button "Check your email to activate your account" is highlighted with a green box and a white arrow pointing to it. Below this, a section titled "Step 2: Download the App + Sign In" is shown, with the text "Concepts is available on your favorite app store." and download links for the App Store, Microsoft, Google Play, and Galaxy Store. At the bottom, a "System Requirements" table provides details for iOS, iPadOS, Windows, and Android/Chrome OS.

Minimum Requirements	iOS   iPadOS	Windows   Android & Chrome OS
OS	15	Windows 10 (19041)   Android 8 (26)
Architecture	ARM64	ARM64-v8a, x64
Memory	1GB	4GB   1GB

and install the  
Concepts App on your  
device.

Login using your email and  
password from previous steps.

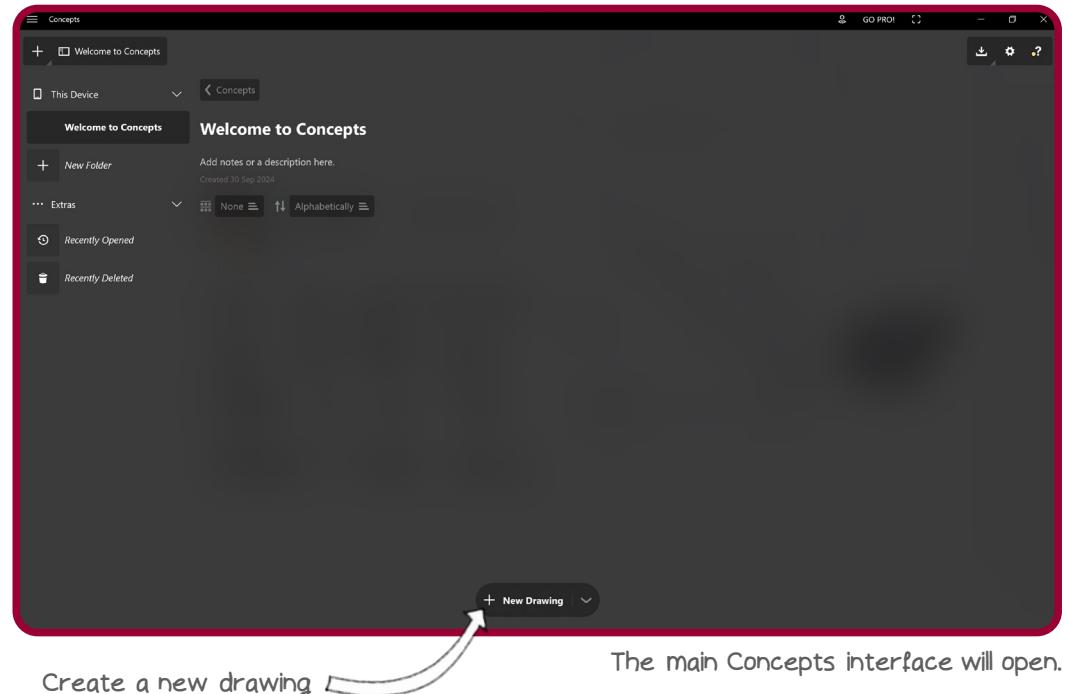

A screenshot of the Concepts app interface. The main window shows a "Welcome to Concepts" screen with a note to "Add notes or a description here." A sub-modal window titled "Account Sign In" is open in the foreground. This window has fields for "Email" and "Password", with "Next" and "Forgot Password?" buttons. Below these are "Legal Info" sections for "Terms of Service" and "Privacy Policy", each with a checkbox. A large red arrow points from the "Email" field in the sub-modal to the "Email" field in the main app window. Another red arrow points from the "Next" button in the sub-modal to the "Next" button in the main app window. A third red arrow points from the "Terms of Service" checkbox in the sub-modal to the "Terms of Service" checkbox in the main app window.

Congratulations, you  
are now ready to sketch!

# STARTING TO SKETCH

## Starting to sketch

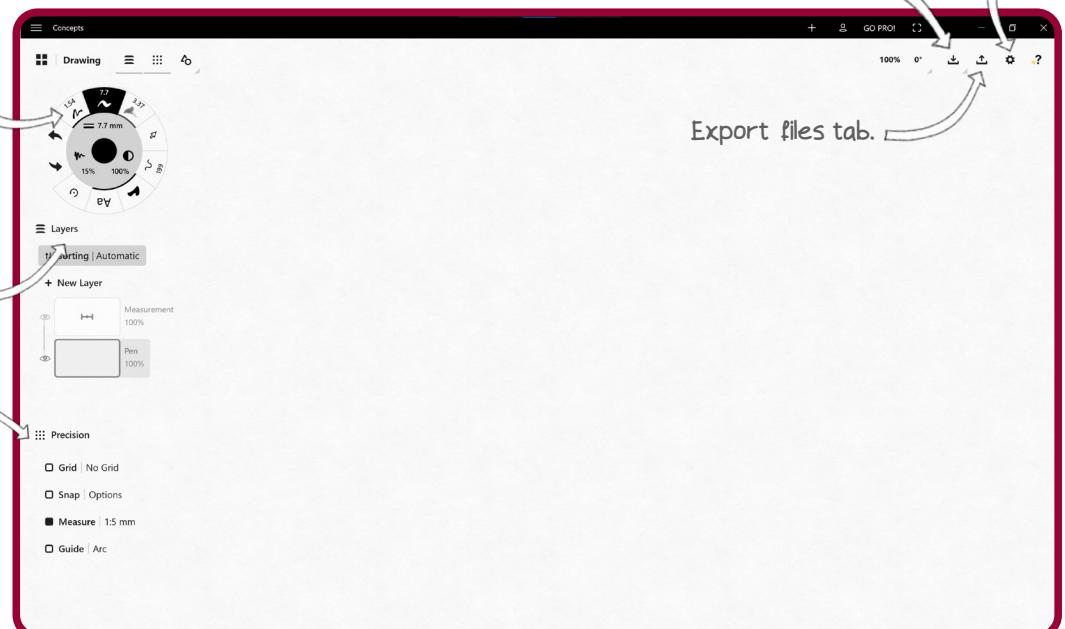

## The Concepts interface

This is the main tool wheel with brushes and tools.

Layers can be created and controlled in this tab.

Precision tools can be turned on from this tab.

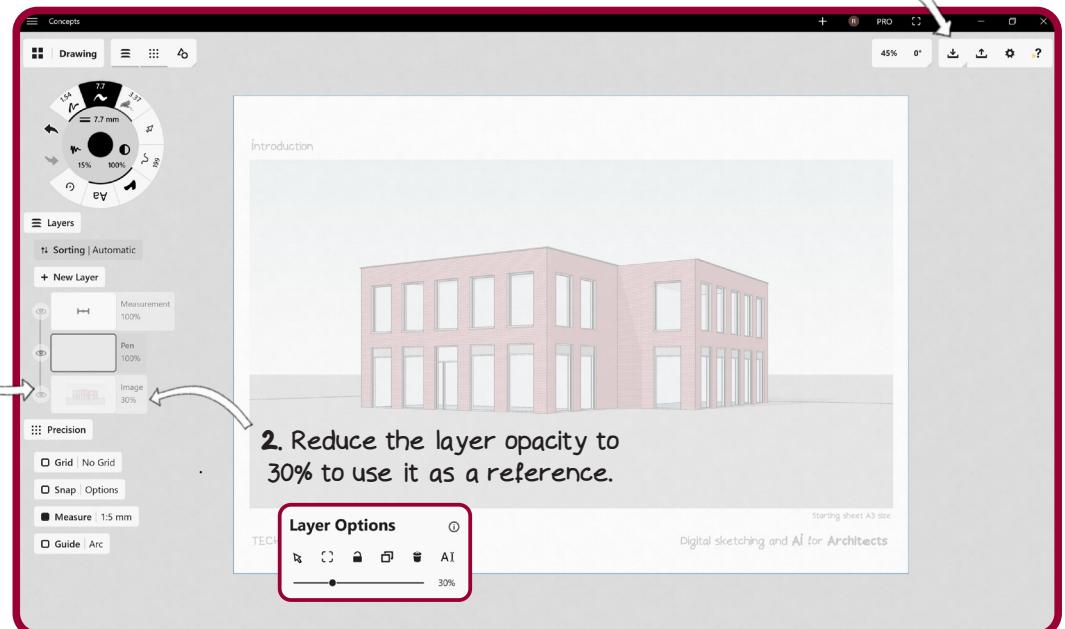

# PRACTICE EXERCISE

## Import the reference image

The image is imported on a separate layer.

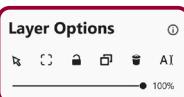

1. Import the TS 00 - Starting File provided with the course.

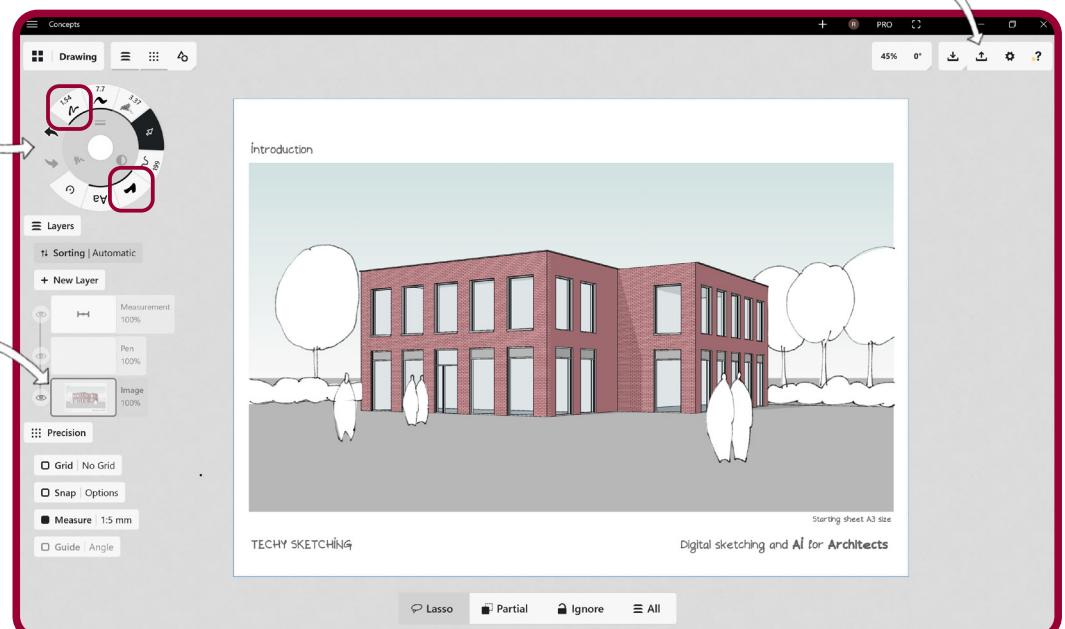

## Entourage practice.

1. Use the Pen and Fill tool to sketch and animate the context.

2. Turn the base layer opacity back to 100%.

3. Export the sketch as a JPG. Keep resolution to 72ppi.

Congratulations!

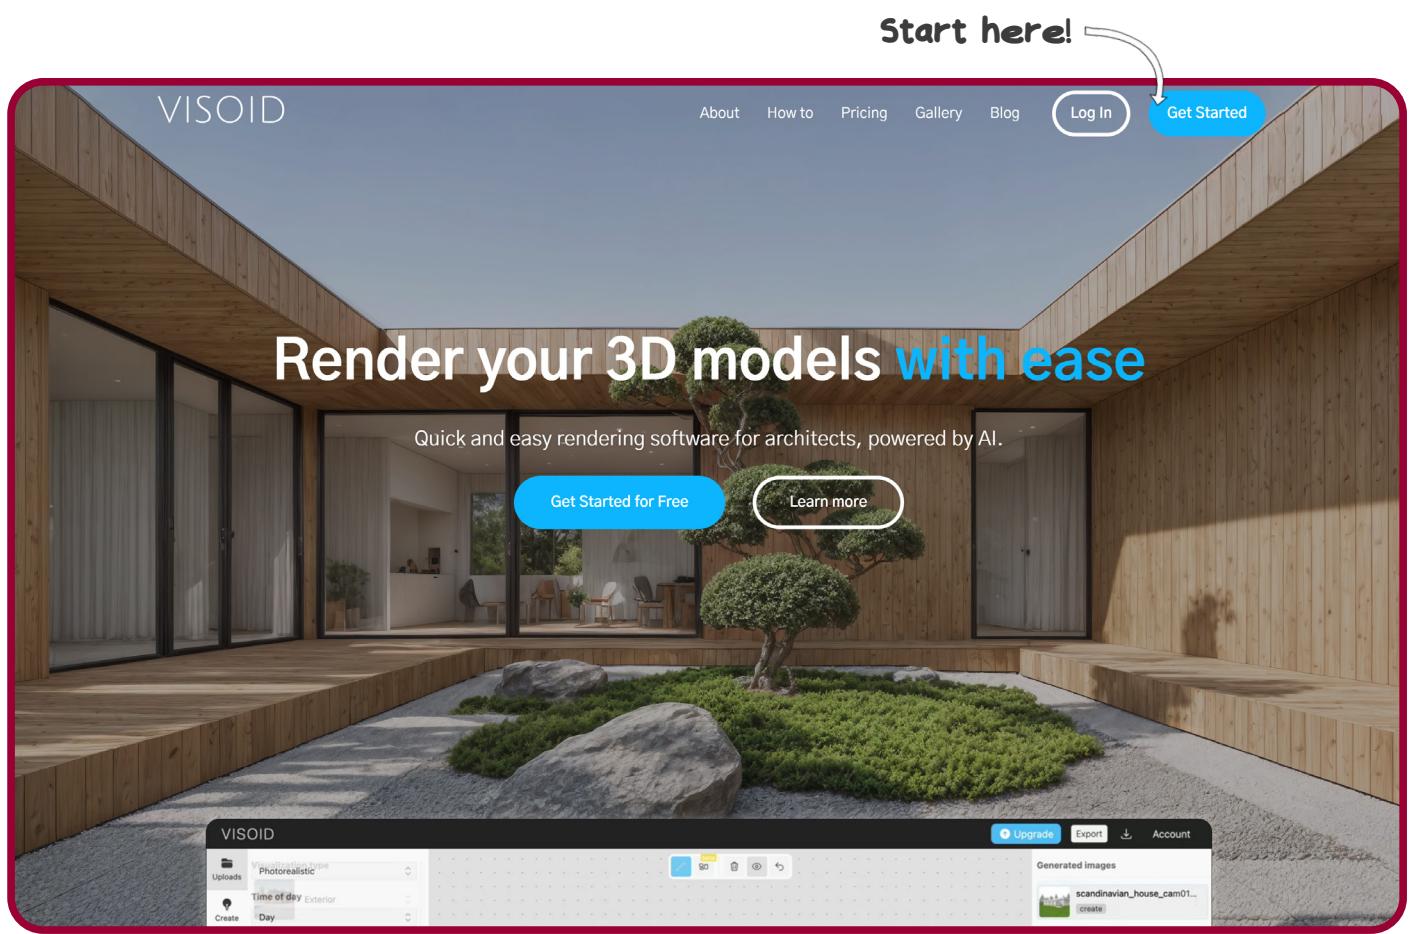

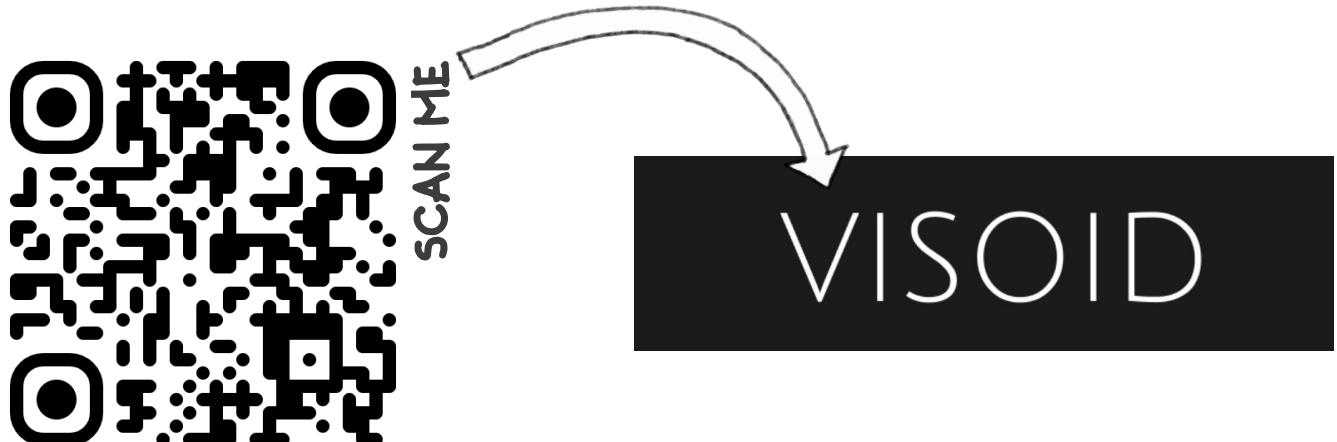

You have now completed the Concepts setup and introduction.

# INTRODUCTION

## Let's setup VISOID.

Use the link below or scan the QR code to install access the VISOID website

<https://www.visoid.com/>

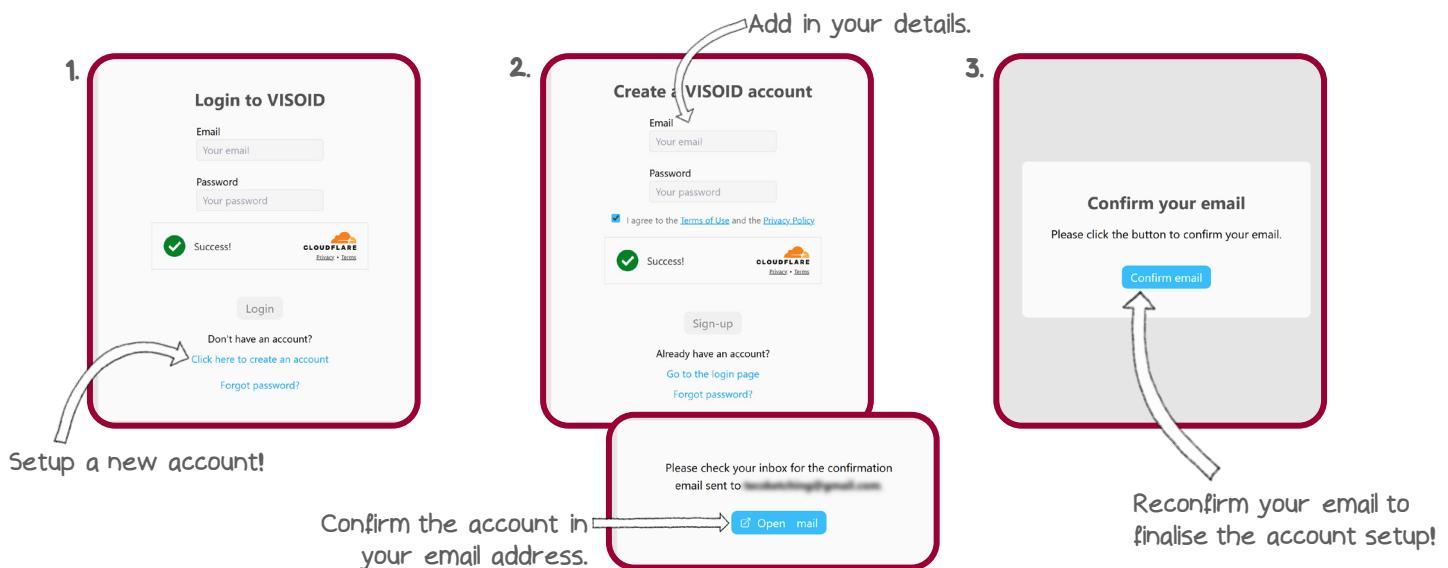

# SETTING UP

VISOID

## The VISOID Account

Setup a new account following the step by step guide.

## Account details

include your details in the account information.

4. **Tell us about yourself**  
Please tell us a little bit about yourself before proceeding to the application.

# EXTENDED PRO TRIAL

VISOID

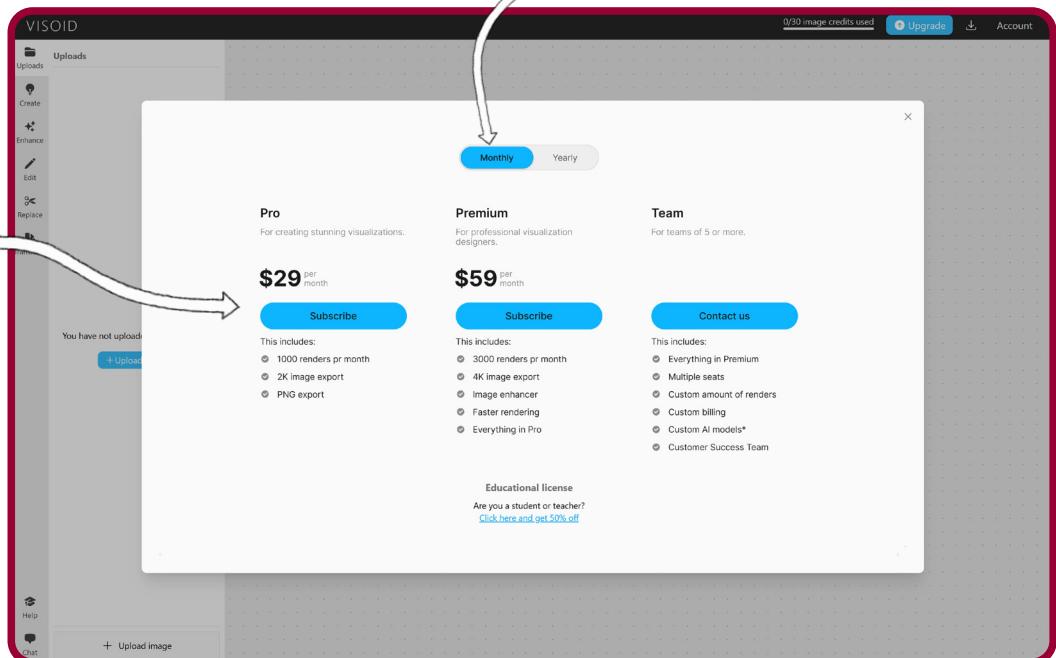

Claim your 30day extended VISOID Pro trial.

## Subscription details.

Note that the extended trial is valid for 30days only or for a maximum of 1000 credits !

## Congratulations!

You have finished the introduction to VISOID and its user interface.  
See you in the training sessions.

# FINAL THOUGHTS

Congratulations!

You have finished the setup and preparation steps for **Concepts** and **VisoID**.

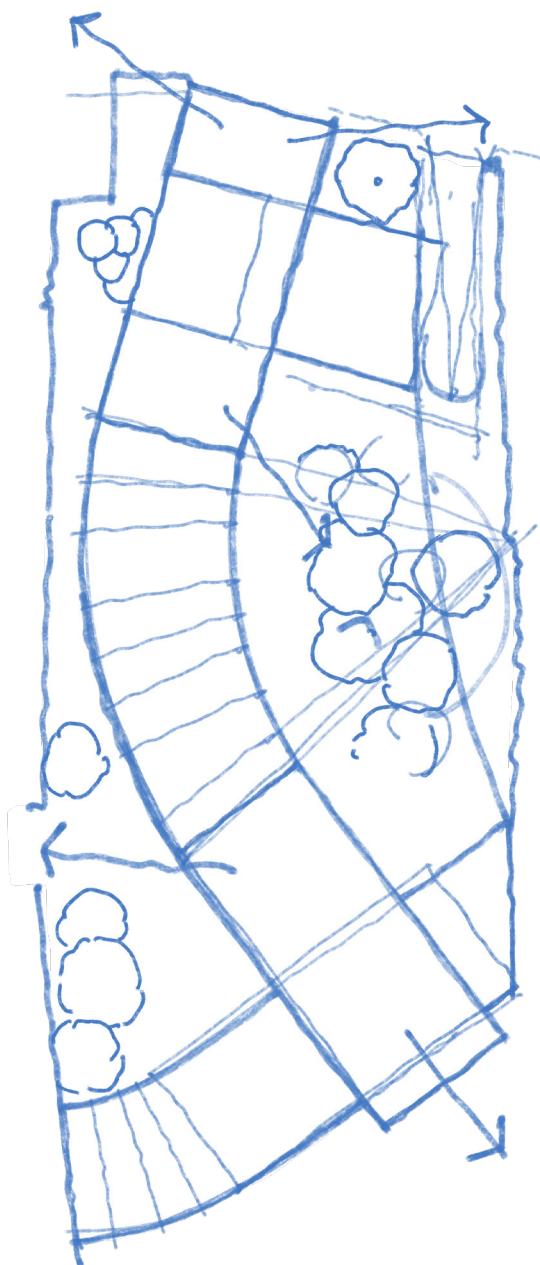

We hope you feel inspired by this new workflow and we are looking forward to see you in the upcoming course.

We want to make sure that your experience with **Techy Sketching** and the **SKETCHING OUT LOUD** courses doesn't end when you finish the session.
