Bahawalpur, Punjab, 63100, Pakistan

Building Cross-Platform Mobile Application with Flutter and Scalable Back-End Solutions with Firebase.

A skilled Mobile Application Developer with over two years of experience in Flutter, Android and Mobile Application Development Process. Passionate about delivering seamless solutions.

Work Experience

Flutter Developer

Jan 2025 - Present

Foreign Client | Portugal

Developed a comprehensive ride-hailing application, integrating real-time tracking, dynamic pricing, and secure payment gateways, enhancing user experience through intuitive UI/UX design.

- User Registration and Profile Management
- Real-Time Tracking and Navigation
- Booking and Scheduling
- Driver Management

Flutter Developer

Aug 2024 - Dec 2024

[Saivra Technologies \(PVT\) LTD](#) | Lahore

Played a key role in developing an OTT platform from scratch, overseeing its conceptualization, design, and technical build-out, preparing it for future launch

- Video Streaming & Communication
- Payment Integration
- Project Management & Documentation

Flutter Developer

Feb 2024 - Dec 2024

[CAS \(Center for Advance Solutions\)](#) | Bahawalpur

Developed Web Application for CAS ,worked on existing applications and lead training workshops.

- Cross- functional Development
- Geo location and Mapping
- Mentorship & Training Internees

Android Developer

Feb 2023 - Feb 2024

[CAS \(Center for Advance Solutions\)](#) | Bahawalpur

Served as an intern, where I collaborated with the development team to design and implement small features for an Android application using Java and created user interfaces with XML.

- Team Work & Collaboration
- Application Development and Maintenance
- Learning, Troubleshoot & Optimization

Projects

Hot-Tv Station

Aug 2024 - Present

Integrated and maintained videoconferencing tools within applications, enabling real-time communication for users, enhancing user engagement, and providing a more interactive experience. Implemented and maintained secure

payment systems for applications, including integrating Stripe and Google Pay for user transactions.

- Video Streaming & Communication
- Payment Integration
- Project Management & Documentation
- Backend Integration & API Development

CAS ELMS

Present

Design, development, and maintenance of several complex applications, including the E-Learning Management System (ELMS), integrating features like advanced admin/user interfaces. Leveraged technologies like Google Maps API and geofencing to provide location-based services within applications.

- Application Development & Maintenance
- Geolocation and Mapping
- Troubleshooting & Optimization

Go Tawen

Jan 2025 - Present

A ride-hailing application with key features including real-time driver tracking, user profile management, and the entire ride flow from request to payment. Using Google Maps API, I implemented precise live tracking for a seamless rider and driver experience.

- Live Driver Tracking
- Google Maps APIs (DistanceMatrix & Dynamic Map)
- multiple optimizations and reduce costing
- Firebase Firestore & Authentication

Core Skills

State Management (Bloc, Riverpod, Provider, GetX), Restful APIs & Google Maps APIs, Flutter Framework & Dart Language, Databases (SQL, Hive, Mongo, etc), BAAS (Firebase, Supabase, etc), Application Architecture (MVVM, MVC, The Clean Architecture, etc), On-Hand Languages (Java, Dart, Python), Extra Tools : VCS (Git & GitHub) - Docker - Google Console - Postman

Education

The Islamia University of Bahawalpur

Aug 2022 - Present

BS Information Technology
GPA: 3.49/4.00

Languages

English (*Communicational*), Urdu (*Native*)

Certificates

Java: Data Structures and Algorithms

Jan 2025

Codio

Introduction to Software Engineering

Jan 2025

IBM

Introduction to DevOps
