93. TEALE, THOMAS PRIDGIN - A Treatise on Neurologic Diseases dependent upon irritation of the spinal marrow and ganglia of the sympathetic Nerve. First Edition. London,S. Highly, 1829.8vo., pp. iv, 120.

The most important contribution to this subject (spinal Irritation) up to this time was the classical work of Teale, who was the first to insist that the pains and other symptoms of disease were due to a morbid condition of the spinal cord. Teale was a British anatomist and surgeon at Leeds Medical School and was "as a surgical operator of great brilliance".

\$40.00

94. THE BED SLIPPER of the Liverpool Northern Hospital. " The Slipper must be inserted under the end of the body as the common bed pan but be passed under the front. A flannel cap for the top part held on by strings around the bowl will afford considerable comfort to the patient". Picture sent on request. \$45.00
