YOUR ONLY SOLUTION PARTNER IN ALL CONDITIONS

HOMPARTS FILTER CATALOG

HOMPARTS

YOUR ONLY SOLUTION PARTNER IN ALL CONDITIONS

Homparts is a specialized supplier of high-quality solutions for the **filtration and marine sectors**. The company provides a wide range of filtration products, including activated carbon and industrial filtering materials, designed to ensure efficiency, durability, and environmental compliance. In the marine industry, Homparts delivers reliable equipment and technical components tailored to meet the demanding conditions of maritime operations. With a strong commitment to quality, timely delivery, and customer-focused service, Homparts acts as a dependable solution partner for professionals worldwide.

HOMPARTS
YOUR ONLY SOLUTION PARTNER IN ALL CONDITIONS

Marine Filters

Marine filtration systems are essential for maintaining clean fuel, oil, air, and water circulation in demanding maritime environments. Designed to withstand harsh sea conditions, they protect engines and onboard equipment from contaminants such as salt, sediments, and particulates ensuring optimal performance, extended service life, and compliance with environmental standards.

Homparts is a reliable partner in marine filtration, offering high-quality products engineered for durability, efficiency, and consistent performance in critical marine applications.

YOUR ONLY SOLUTION PARTNER IN ALL CONDITIONS

Activated Carbon Filters

Activated carbon filters are essential for removing odors, organic compounds, and harmful contaminants from air and water systems. With their high adsorption capacity, they improve operational efficiency, protect equipment, and support environmental compliance especially in demanding marine applications.

Homparts has strong expertise in activated carbon solutions, providing reliable and high-performance filtration products tailored to marine and industrial needs.

YOUR ONLY SOLUTION PARTNER IN ALL CONDITIONS

OIL&FUEL Filters

Our oil and fuel filters are designed to ensure maximum engine protection and optimal performance in marine and industrial applications. By efficiently removing contaminants such as dirt, metal particles, sludge, and water from lubrication and fuel systems, our filters help extend engine life and reduce maintenance costs.

Manufactured in compliance with international quality standards, our filters provide high filtration efficiency, excellent pressure resistance, and reliable performance even under demanding operating conditions.

Available in various sizes and micron ratings, our solutions are suitable for main engines, auxiliary engines, generators, and fuel treatment systems.

HOMPARTS
YOUR ONLY SOLUTION PARTNER IN ALL CONDITIONS

Hydraulic Filters

Our hydraulic filters are developed to protect hydraulic systems from contamination and premature wear. By effectively removing particles from hydraulic fluids, they help maintain system stability, improve operational reliability, and extend component lifespan.

Suitable for marine machinery, deck equipment, steering systems, and industrial hydraulic applications, our filters provide high dirt-holding capacity, optimal flow characteristics, and strong structural integrity under high pressure conditions.

HVAC - AIR Filters

Our air and HVAC filters are engineered to maintain clean and efficient airflow in marine vessels and industrial facilities. Designed to capture dust, airborne particles, and other contaminants, they help protect equipment, improve air quality, and ensure system efficiency.

We offer a wide range of filtration classes and configurations suitable for engine air intake systems, ventilation units, and HVAC installations. Our filters are manufactured with durable materials to withstand harsh marine environments, ensuring long service life and consistent performance.
