The HomParts team offers spare parts for equipment manufactured in Japan, the USA and Europe.

With our combined knowledge, HomParts can establish a contact across the industry to provide efficient and cost-effective answers to your questions.

HomParts can also source new Ship Spare Parts from Manufacturers, Original Equipment Manufacturers (OEM) and subcontractors.

However, in all cases, our sources are time-tested and proven manufacturers where time is never sacrificed.

We serve the OEM customer to meet technical, commercial and logistical considerations.

HomParts also operates in Ship Spare Parts, a professionally managed organization that deals specifically with marine suppliers.

FENDER OPEN

By definition, the collision of two rigid blades that mutually connect each other at a certain speed placed between them to return the kinetic energy of the body to its previous state and not to cause damage and elastic squeezing movement due to self-compression. the structure is pushed back to the moving object.

Fender on the one hand, on the other hand, great help in approaching the task given to the general definitions above, in a healthy and safe way with aging or hardness. Approaches to the ship caused by the horizontal and vertical movements of the waves and absorb the various energies generated by them.

GASKETS

FENDER TYPES

There are many fenders designed according to the needs of various types. It is possible to collect these five groups.

- Wedding Modular Fenders
- Cylindrical Fenders
- The end part of the fenders
- The second part of the fenders
- Stantan piece fenders (not a production program)
- Installation or filling of surface type fenders (not a production program)
