INTRODUCTION...

Tailorwood Modular System began as a provider of comprehensive architectural and interior design turnkey projects for both residential and commercial spaces. Over time, we have evolved to specialize in manufacturing bespoke furniture that caters to our clients' preferences and satisfaction. Equipped with advanced woodworking machinery and supported by a highly qualified and skilled team, we operate out of Sonipat, Haryana. With over 15 years of experience, we pride ourselves on delivering exceptional service and maintaining a base of highly satisfied customers in Sonipat, Delhi NCR,Uttarpradesh and the surrounding regions.

INTELLIGENT INNOVATION

ENGINEERING

Cable tray is attached to the beam aiding easy laying of cables. **The design allows fixing the table top at the last moment, avoiding scratches and damage**

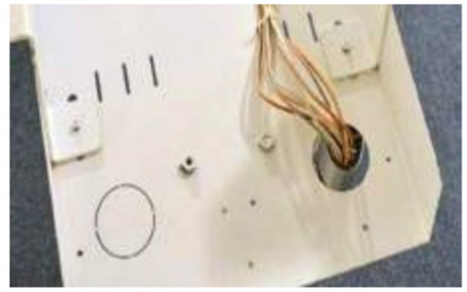

Vertical duct is to cover all cable from the floor. Its equipped with a clearance space which provides clearance in case of wire pulling from off-centre positions.

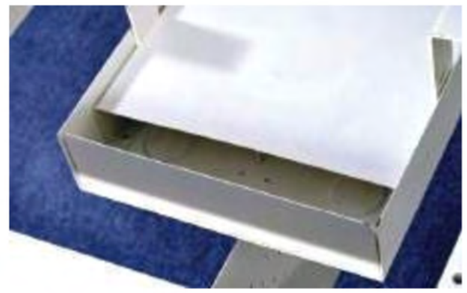

Sliding beam design allows flexibility to accommodate layout surprises or errors

AESTHETIC

4 nos of knock-down cut-out provided with each cable tray. This allows closest entry of cables avoiding hanging wires.

Cable tray end cover is an aesthetic substitute of side modesty. it also protects electrical cables from falling from cable tray. It reduces cost of side modesty where not required.

Perforated modesty completes the look and also gives ventilation.
