- 541511 - Custom Software Development
- 541614 - Process, Physical Distribution, and Logistics Consulting Services
- 541690 - Other Scientific and Technical Consulting Services

ABOUT US

Lanevis provides operational, strategic and technical services to federal government, small business, and non-profit organizations. We customize our services/solution framework for each client scenario; maximizing effective outcomes while minimizing time and resources. Lanevis' top priority is to add value to client operations and initiatives; solutions that will be utilized and leveraged long after Lanevis has completed services.

PAST PERFORMANCES

- Food & Drug Administration – CDER PMO
- Food & Drug Administration – CDER SharePoint Support
- Food & Drug Administration – OCD Technical Services
- Veteran's Affairs – OIT CFO & CIO Support
- HHS Program Support Center – Acquisition Resources Forecasting

DIFFERENTIATORS

- **Leverage existing tools & infrastructure** to develop low cost/code (and maintenance) / high impact solutions that reduce / eliminate manual and redundant tasks
- **Serve as trusted strategic advisors** for operations and IT needs
- **Build consensus** among disparate groups/users to maximize solution effectiveness
- **Deliver above expectations** on time, on budget

CORE COMPETENCIES

Low / No Code Solutions

- **Business Applications** - Develop and maintain data-driven infrastructure to create / manage pertinent & non-existent data to fill reporting gaps; increasing transparency in operations and effectiveness
- **Automated Workflows** - Leverage workflows to send custom reports, audit data structure, and alert POCs when action is required; significantly reducing human (resource / staff) intervention and/or error

Data Visualization & Business Intelligence

- **Business Intelligence & Dashboarding** – Create analytical solutions across several disciplines (budget, acquisition, HR, production, policy, etc.) leveraging Tableau, Power BI, and the MS-Office Suite
- **Customized Dynamic Reporting** - Continually develop and maintain client driven reporting, utilizing cloud data / APIs that update and automatically distribute reports / analytics

Project & Program Management

- **IT Strategic Alignment & Performance Management** - Link IT investments and initiatives to strategic priority, determine IT policy gaps, as well as develop roadmaps and associated metrics to measure progress and compliance
- **Program Management Office (PMO)** - Build and mature IT processes from cradle to grave; tracking/reporting strategy-driven metrics for continuous improvement

CERTIFICATIONS

- SBA 8(a) Certified – Exp 04/2032
