

We're Hiring: QA Automation Interns

Job Title: QA Automation Intern

Location: Hybrid (India & Lithuania)

Job Type: Full-Time Internship

About the Role

At *Creativity Ventures*, quality is at the heart of our innovation. We're looking for **QA Automation Interns** to join our engineering team. This role will give you hands-on experience in building and executing automation test scripts, API testing, and ensuring product reliability while working on next-gen AI-powered applications.

◆ Responsibilities

- Assist in designing and developing automated test scripts.
- Support manual and automated regression testing.
- Learn and use test frameworks like Selenium, Cypress, or Playwright.
- Conduct API testing using Postman or similar tools.
- Collaborate with developers to identify, log, and track bugs.
- Participate in daily stand-ups and Agile ceremonies.
- Document test cases, results, and defect reports.

◆ Required Skills (Intern-Level)

- Basic understanding of SDLC, STLC, and testing concepts.
- Familiarity with at least one programming language (Java, Python, or JavaScript).
- Exposure to any automation tool (Selenium, Cypress, etc.) is a plus.
- Understanding of API testing tools like Postman.
- Strong problem-solving and analytical mindset.
- Eagerness to learn CI/CD concepts.

What We Offer

- Real-time project exposure in QA automation.
- Training and mentorship on automation frameworks.
- Opportunity to work with global teams (India & Europe).
- Collaborative, learning-first environment.
- Internship certificate + possibility of full-time placement based on performance.
