

Transfer Multisort Elektronik: from local roots to global reach

Founded in 1990 as a small family-run electronics shop in Łódź, Poland, TME has grown into one of Europe's largest distributors of electronic, electromechanical, industrial automation components, and workplace equipment.

From the very beginning, TME has demonstrated a strong spirit of innovation. After just four years of operating as a local shop offering components for service and small-scale production, the company pioneered a mail-order sales model for electronic parts - a novel concept at the time. This innovative approach, combined with the development of the Polish and Eastern European economies, attracted new customers and allowed TME to continually expand its product range.

TME's current headquarters

In 1997, TME established its modern headquarters and logistics centre in Łódź, which has since undergone multiple expansions to meet growing demand.

TME's logistics centre in Łódź

Over the years, TME has embraced new technologies and business models, evolving into a leading online distributor. Discover the latest technologies and components through TME's global online catalogue <https://www.tme.eu/gb/>.

TME's commitment to accessibility, efficiency, and quality has been recognised through internationally accredited standards, including ISO 9001:2015-10 for quality management and ISO 14001:2015-09 for environmental management — underscoring TME's commitment to sustainability and excellence.

Automated logistics center

Its high quality logistics facilities incorporate proprietary technological solutions, including automatic sorters, order picking and packing robots - automating as much as 60% of warehouse processes. This innovations allow TME to respond to the needs of its global customer base, dispatching up to 10,000 parcels per day, with European Union deliveries arriving within 24-72 hours.

Despite this automation, TME creates valuable job opportunities, employing nearly 1,500 workers across its Polish headquarters and 12 subsidiaries, creating an environment not only of efficiency, but of collaboration for growth.

TME in the UK: bringing global excellence closer to customers:

In November 2016, TME established its Birmingham headquarters for its UK subsidiary, providing a gateway to UK and Irish markets. This extends the benefits of TME to UK clients with access to its offering of over 1,000,000 products from over 1,400 leading manufacturers. TME thus combines global reach with local presence.

HYPED is proud to be partnered with a company whose values of innovation and quality align with our own, and are grateful for TME's continued partnership and contribution to our mission towards advancement of sustainable transportation technology.
