Greetings Community Friend!

For the 50<sup>th</sup> anniversary of the establishment of Pinson Mounds State Archeological Park in 2024, our community organization began a bold project – a 3D interactive map of the site for display in the park museum. The Friends of Pinson Mounds was established in 2019 as a 501(c)(3) organization to support the park's mission and vision: to promote, preserve, and protect this sacred site's 2,000+ year history and archeological resources.

- **3D MAP OF PINSON MOUNDS** – In support of Tennessee State Parks' emphasis on ACCESS 2030 to make all State parks more accessible to visitors by 2030, the Friends of Pinson Mounds is working to build an interactive 3D map of the park to install in the park museum. This 3D interactive map would use the latest LIDAR mapping (completed January 2024) to highlight the featured archeological resources of the park and park trails and to provide educational information. Estimated totals for the production of this 3D interactive map are \$25,000. If you as an individual or your company would like to assist with sponsoring this project, please indicate your commitment on the accompanying page.

In addition to inviting you to participate with us in supporting our 3D interactive map project, the park has many annual activities, events, and volunteer dates with which we welcome your support and participation. Check the following resources for details across the year:
