# QUALITY CONTROL MANAGEMENT

Fayd Alameen company depends on Quality control management is used synonymously with quality assurance and improvement programs.

Quality control management is based on the fundamental concepts and benefits of process standardization, information centralization and workflow streamlining. The goal of quality control management systems is to minimize errors, waste and miscommunication, as well as maximize quality, profits and efficiency.

Quality control programs must be both process- and results-driven. That is, there must be a non-stop focus on evaluating and standardizing work processes. This is documented through Standard Quality Procedures (SQPs), which are quality guidelines that instruct employees how to accurately and efficiently perform every job. Related to this, quality control programs goal oriented and not become bogged down with complicated or bureaucratic processes. Lastly, continual improvement is a central theme that requires every aspect of the program to be persistently critiqued and adjusted.

# QUALITY CONTROL METHODS

Quality Assurance: this method covers activities such as development, design, production, servicing, and production Quality assurance can also cover areas of management production, inspection, materials, assembly, services and other areas related to the quality of the product or service.

Failure Testing: this method involves testing a product or service until it fails. It can be placed under different stresses. This method will expose the weaknesses of the product in question.

Statistical Control: almost all companies use statistical control. This process involves randomly sampling and testing a portion of the output.

Company Quality: with management leading the quality improvement process and other departments following, a successful product or service will emerge.

Total Quality Control: measure used in cases where service decreases despite implementation of statistical quality control techniques or quality improvements.

# FAYD ALAMEN

# HSE Policy

Fayd Alameen CO.

Fayd Alameen Company for General Contracts & TRADING & Transportation, business comprises all the activities related materials supply and maintenance inside oil and Gas fields with provision of logistic service and construction works as well. It is the policy of Fayd Alameen to conduct all of its operations in a manner which protects people and property and strive to improve its health and safety performance. Fayd Alameen recognizes that prevention of accidents, incidents and ill health is essential to the efficient operation of its business. Accordingly, the management of health and safety issues is an integral part of the company's management arrangements and commands at least equal prominence when balanced against operational and commercial considerations. Fayd Alameen recognizes the value of both its own employees and its contractors and considers their well-being to be a major factor in the success of all its business activities. Fayd Alameen has an established Corporate Integrated Management System in place appropriate to purpose and context of the organization to ensure that:

1. There is a management organization in place which will plan operations resulting in the provision of safe systems and places of work and the effective management of health and safety at all of its operated sites.
2. It provides the necessary training for its employees and contractors to ensure that they have the knowledge and capability to conduct operations in a safe manner.
3. It co-operates with its contractors, who also have defined responsibilities for health and safety, to provide safe and healthy work places.
4. Adequate contingency plans for emergency situations are developed and implemented for all of its operations.
5. There is effective security for personnel and company assets based on risk assessment at all operated locations and during travel to and from locations.
6. It consults with its employees on matters affecting their health and safety.
7. It complies with all applicable health and safety legislation.
8. SKC will ensure that all its contractors are fully aware of the company's health and safety policies and the applicable legal requirements to any of the activities carried out for and on its behalf and shall require that such policy is observed and complied with by its contractors.

This Health and Safety Policy is communicated inside organization and is available for interested parties and shall be applied at all Fayd Alameen operated locations. Fayd Alameen will review and audit all aspects of the management system to ensure that it is being complied with and to seek improvements to the system. The management system will continue to be actively developed in line with the development of Fayd Alameen business activities.

Although overall responsibility for health and safety rests with Fayd Alameen, and ultimately the CEO, every employee and contractor must recognize their own responsibilities (in particular, any specific responsibilities under legislation, or delegated to them as individuals) to ensure the health and safety of themselves and others.

# Supply Chain Management

**Supply Chain Management (Fayd Alameen) is the oversight of materials, information, and finances as they move in a process from supplier to manufacturer to wholesaler to retailer to consumer. Supply chain management involves coordinating and integrating these flows both within and among companies. It is said that the goal of any effective supply chain management system is to reduce inventory (with the assumption that products are available when needed). Supply chain management flows can be divided into three main flows:**

**The product flow includes the movement of goods from a Fayd Alameen supplier to our client's stores. The information flow involves transmitting orders and updating the status of delivery. The financial flow consists of credit terms, payment schedules, and consignment and title ownership arrangements. Fayd Alameen Company keen to maintain good staff in practical positions, so it's start from chose the best chain management to cover all requirement. So, our supply chain manger plan and organize the movement of goods and materials form suppliers and manufacturers through right ways to customers. Our company famous and our good relationship make our supply chain manager negotiate and work with people all levels smoothly. As well as appointed one Iraqi supply chain manger give more priority for acknowledge the geographic area inside and outside Iraq, as well as our Employ in Kuwait and UAE can manage the procurement, Logistic and ship our requirement form our international suppliers there. Refer to our old experience in supply food and catering to investment company during last seven years make us able to manage and active more than one way to achieve excellent delivery to our clients in any bad situation with food delivery from camp to camp.**

# Chemicals Supply

*We also meet all the needs of foreign companies working in this field of chemicals because of our experience and official approvals we qualify to be at the forefront of competing companies in Basra.*

*There is another list of chemicals in the same field, where we do the same work and supply them in a systematic and formal to be a company*

## “ OUR MATERIALS SUPPLYING ”

*Cement type - G - , HCL , H2S Scavenger Cronox - 263 W , Anti Sludge AR 66 , Surfactant Arsulf 9504 , Iron control Agent AY71 , Non Emulsifier ACE 212S , Calcium carbonate , Inhibitor , Bactericide , Corrosion , Xylene , Butyl , Bentonite , Barite , Surfactant N- 55 , Cenosphere , Micro Silica , Fly Ash , Calcium Chloride*

# SUPPLY OF ELECTRICAL MATERIALS

The extended services of our company can supply variety of electric poles and external lighting systems, supply of all types and sizes of cables including high voltage power cables.

We also import all connection cables (intermediate and final) made of copper material from different main suppliers and in large quantities the supplied wiring will have best resistance to natural factors and citrus.

The engineering team has the required engineering experience to design and install power stations with ability to provide the installation and support of various electrical components, place your order for manufacturing of industrial materials according to requirements related to electrical and electrical products.

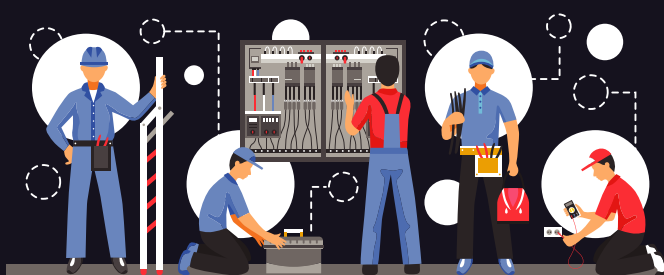

Supply and installation of generators.  
 Generator supply with various types and sizes.  
 Supply of spare parts for electrical equipment.  
 Power transmission poles with necessary parts.  
 External lighting poles with accessories including lamps adapters.  
 Wiring power transmission.  
 Construction and design of production of electric power stations  
 Supply of all types of containers such as barrels, spark plugs and electrical wiring.  
 Modern household electrical technology such as electrical circuit and electrical meters.  
 Operation equipment in the field of automation, electrical accessories such as smart switches.

## SERVICES Oil Gas

In (Fayd Alameen) we have shown great expertise in deploying distinguish innovative engineering construction solutions in Oil and Gas support services projects carried out for our numerous clients.

These Completed and on-going projects comprise works that involve;

1. Pipeline Integrity Survey And Analysis Works.
2. Cathodic Protection Installation Services And Maintenance Works.
3. Pipeline Coating Repair And Rehabilitation Works.
4. New Pipeline Construction Works.
5. Existing Pipeline Replacement And Rehabilitation Works.
6. Piping Construction Works.

7. Storage Tanks Construction And Maintenance Works.
8. Special Equipment Installation And Pre-Commissioning.
9. Hot Tapping Services.
10. Cold Cutting And In-Line Welding Services.
11. Civil Construction Works For Oil and Gas Facilities.
12. Oil And Gas Equipment Maintenance Services.

## Cross Country Pipelines

- API Storage Tanks
