What is the Business Insights Dashboard?

The Business Insights Dashboard is a powerful analytics tool designed to help studios understand and grow their digital presence. It allows you to track your studio's performance across major platforms like Instagram, Facebook, Pinterest, TikTok, YouTube, as well as monitor your website traffic, Google ratings, and customer reviews.

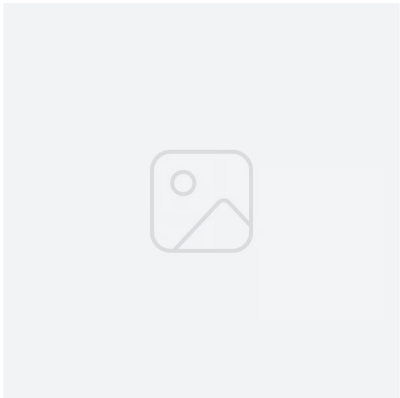

We gather data on key metrics such as followers, likes, subscribers, views, and review content, and use this to generate two unique scores:

- **Rating Ratio** – based on the quality and quantity of your customer ratings.
- **Digital Presence Score** – a comprehensive measure of your online visibility and engagement.

For paid studios, this dashboard offers valuable benchmarking by showing how you rank among other studios in your city, country, and globally. It highlights growth opportunities, reveals underused social media niches, and provides strategic guidance—whether you should focus more on content creation, boost your review count, or expand to new platforms.

In short, the Business Insights Dashboard gives you a clear, data-driven path to improve your visibility, stand out from the competition, and grow your studio with purpose.
