

AI LUMINS

PERMANENT LIGHTS

Ai Lumins offers a cutting-edge lighting solution tailored for homes and businesses. With our precision-engineered track system, paired with our advanced smart controller and premium LED lights, you're empowered with unparalleled customization.

Use our intuitive mobile app to design patterns, animations, and colors effortlessly. Control each light individually to create stunning architectural designs or illuminate your space in vibrant, dynamic colors for any occasion.

Ai LUMINS TRACK LIGHTING

Elevate your home's aesthetic with Ai Lumins' custom track lighting system. Choose from hundreds of vibrant colors while our sleek, low-profile tracks seamlessly blend into your existing fascia and soffit. Designed for perfect light spacing, our tracks stay discreet during the day and create a captivating ambiance at night.

At Ai Lumins we uphold the highest standards of quality and customer service, ensuring your lighting solution exceeds expectations.

AI LUMINS

INDIVIDUALLY ADDRESSABLE LIGHTS

Ai Lumins' advanced lighting system gives you complete control over each light, allowing for precise customization with any RGBW color. Whether you want to create a pot light effect, design a unique pattern, or highlight specific sections of your home, IllumiDEL offers endless possibilities to transform your space with precision and creativity.

CUSTOM ARCHITECTURAL LIGHTING

Celebrate every occasion with style! From birthdays to Christmas and Valentine's Day, create vibrant displays tailored to your special moments. Design dynamic patterns that run, chase, or jump—your creativity sets the limit!

FULL CONTROL

With our intuitive app, you're in charge. Select individual lights to turn on or off and customize them with any RGBW color scheme. Personalize your home's lighting with limitless combinations for a truly unique experience.

AI LUMINS

LAMP TECHNOLOGY

RGBW LED (Red, Green, Blue, Warm White)

At Ai Lumins we deliver true lighting innovation with our RGBW LED technology. Unlike standard RGB lighting, which struggles to achieve a consistent warm white, our lamps feature a dedicated fourth spectrum, creating a genuine 2700K warm white. Customize your lighting tone—warm or cool—based on your preference.

How to Verify True Warm White (RGBW vs RGB)

- Look for a yellow mark on the LED inside the lamp, indicating the ability to produce constant warm white.
- Check the app for a 4-spectrum slider (red, green, blue, and white). If absent, the lights lack true warm white capability.

More Specifications

- **Surge Protection:** Each lamp includes built-in surge protection to safeguard against power surges and lightning strikes.
- **4-Channel Output LED Driver Circuit:** Our system manages four individual signals from the controller, ensuring precise color output.
- **Signal Reshaping & Amplification Drive Circuit:** Ensures reliable signal transmission between lamps, even across long distances.
- **UV-Protected Lamps and Wiring:** Protects against yellowing and damage from UV exposure for lasting durability.
- **Constant Power Output:** Our internal oscillator provides even lighting and a programmable constant current for seamless performance.

CONNECTORS & CABLES

Ai Lumins lamps are designed for simplicity and durability:

- **Threaded Waterproof Connectors:** Each lamp has compression-fit connectors that are watertight and UV-protected, ensuring longevity.
- **Easy Maintenance:** If repairs are needed, threaded connectors allow for quick and simple removal or replacement.

For any repairs or replacements, contact your Authorized Ai Lumins Dealer for professional assistance.

AI LUMINS

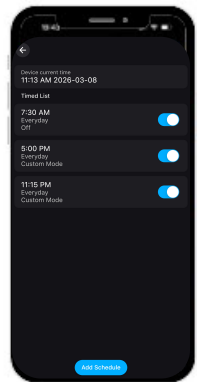

INVISILIGHTS APP - UNLOCK YOUR CREATIVITY

Transform the way you control your outdoor lighting with the  app. Personalize colors, design patterns, and take full control of your lights effortlessly.

STATIC COLOR WHEEL

Select your preferred color and fine-tune it with a preview. Save it as a preset for easy access.

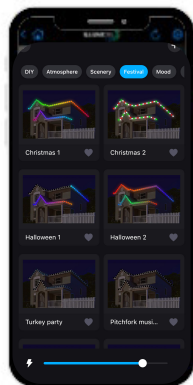

SCHEDULE TIMERS

Set custom schedules for specific colors, patterns, or animations. Perfect for automating your lighting display.

INDIVIDUALLY ADDRESSABLE LIGHTS

Control each light individually with Ai Lumins smart LEDs. Create stunning architectural patterns tailored to your home's design.

ACCESS PATTERNS

Access a variety of patterns for holidays, sports events, celebrations, and more.

SMART LIGHTING CONTROL

The  controller is accessible via the iOS or Google Play App. Enjoy complete control, schedule timers, share devices, and manage updates—all from the convenience of your mobile device.

KEY FEATURES

HOME PAGE

- Organize patterns into custom or pre-built folders (e.g., sports themes, kids' patterns).
- Easily create and save complex color patterns.
- Adjust brightness and animation speed with sliders.
- Save architectural presets (cool white, warm white) and more.

TIMER

- Save and manage multiple timers.
- Set timers for holidays, birthdays, or daily routines.
- Set sunrise and sunset timers for automatic lighting adjustment.

SHARING FEATURES

- Merge controllers to control several systems as one.

CUSTOM

- Preview architectural lighting with real-time controls.
- Create and save lighting for specific sections of your home (peaks, sidewalks, etc.).
- Copy, paste, and organize patterns for ease of use.

DOWNLOAD

- Choose from festive patterns for holidays like Christmas, Halloween, Valentine's Day, and more. Customize for specific occasions, sports teams, or national colors.
