RE: Kandiyohi County  
Big Kandiyohi Lake – North/Northeast  
Community Assessment Report Approval  
Project Number 280664

Dear Eric Van Dyken:

The Minnesota Pollution Control Agency (MPCA) is pleased to inform you that we are hereby granting approval of your Community Assessment Report (CAR) submitted on May 29, 2024, by Stantec Consulting Services Inc.

The proposed report is the background study for North/Northeast portion of Big Kandiyohi Lake for the possible replacement of subsurface treatment systems for the community. This area has approximately 148 properties. The legal description of the location of the proposed area is Sections 22, 23, 26, 27, 28 Township 118 North, Range 34W, Fahlun Township, Kandiyohi County.

The CAR and related information indicate that the recommends three options: continue with private Subsurface Sewage Treatment Systems (SSTSs), pursue a state permitted large subsurface treatment system that is over 10,000 gallons per day, or pursue regionalization with the city of Lake Lillian. No overall choice was decided in the CAR.

If you have any questions regarding this approval, please contact me at 507-206-2603.

Sincerely,

*Corey J Hower*
