

- Which one is Prose and which one is Poetry
- What's the same about both of these?
- How do they each describe the tree?
- Which one helps you understand what's happening?
- Which one helps you feel or see the change?

In autumn, many trees lose their leaves.
This happens because there is less sunlight, and the tree starts to slow down.
The green colour fades, and we see yellow, orange, or red.
The leaves dry up and fall to the ground, where they become part of the soil.

The leaves let go
One by one —
Like golden whispers
On the wind.
Bare branches stretch
Toward a pale sky
And wait.
