

Coil Wrapping Machine

Our Coil Packing Machine, also known as a coil wrapping machine, is specifically designed for efficient eye-through film wrapping of coils. These machines are equipped with ring-type wrappers, making them ideal for various coil packaging needs. Different versions of our coil stretch wrappers are available to accommodate different coil sizes, handling methods, packing materials, and specific requirements.

At WinTech Packaging, we offers a Wide range of coil packaging solutions to ensure uniform and effective packaging for a variety of products, including hose coils, pipe coils, wire coils, bearings, cables, steel coils , CRGO coils, copper coils and many more. With over 1200 sets of coil packing equipments deployed worldwide, our team boasts extensive experience in providing solutions that enhance packing speed and replace manual labor.

Are you looking to improve your coil packaging efficiency and reduce labor costs? Our comprehensive solutions address these challenges and more. Before making a decision, it's crucial to explore all available options tailored to your product's requirements. Our catalog covers various chapters detailing different machine versions and methods for coil packaging. From coil size considerations to handling methods and factory layout constraints, we have solutions to fit every need.

Gain a comprehensive understanding of the coil wrapping machines available in the market and revolutionize your packaging process with

WinTech Packaging Solution Pvt.LTD.

Horizontal Coil Wrapping Machine

Specifications :

Power Supply: 1 phase / 3 phase
 Coil ID: min 200 mm required
 Coil OD : 350 - 600 mm
 Coil Width : 50 - 200 mm
 Coil Weight : Max 30 kg
 Coil Wrapping Time : 40 - 60 coil per min (depends on coil size)
 (* Machine can be customized as per customer need)

Binding Wire

GI Wire

Flexible Pipe

Cable Wire

Horizontal Coil Wrapping Machine With Ring Plate Forward & Reverse

Specifications :

Power Supply : 3 phase
 Coil ID : min 800 mm required
 Coil OD : 1400 - 2800 mm
 Coil Width : 150 - 500 mm
 Coil Weight : max 3000 kg
 Coil Wrapping time : 15 - 20 coil per min (depends on coil size)
 (* Machine can be customized as per customer need)

Rubber hose Pipe

Underground Cable Pipe

HDPE Pipe

Vertical Coil Wrapping Machine For Low Weight

Specifications :

Power Supply : 1 phase
 Coil ID : min 250 mm required
 Coil OD : 800 - 1300 mm
 Coil Width : 100 - 350 mm
 Coil Weight : max 30 kg
 Coil Wrapping time : 40 - 60 coil per min (depends on coil size)
 (* Machine can be customized as per customer need)

Drip Pipe

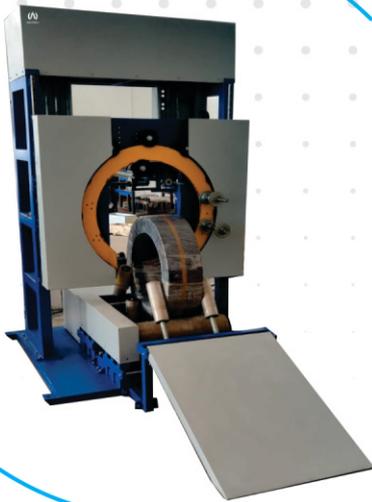

Hose Pipe

Tyre

Vertical Coil Wrapping Machine For Medium Weight

Specifications :

- Power Supply : 3 phase
- Coil ID : 350 - 508 mm required
- Coil OD : 700 - 1000 mm
- Coil Width : 100 - 350 mm
- Coil Weight : 50 - 450 kg
- Coil Wrapping time : 40 - 60 coil per min (depends on coil size)
- (* Machine can be customized as per customer need)

Steel Wire

Steel Strips Coil

Copper Strips Coil

Tyre

Vertical Coil Wrapping Machine With Trolley Car System For Heavy Weight

Specifications :

- Power Supply : 3 phase
- Coil ID: 410 - 508 mm required
- Coil OD : 700 - 1400 mm
- Coil Width : 100 - 400 mm
- Coil Weight : 400 - 16000 kg
- Coil Wrapping time : 10 - 25 coil per min (depends on coil size)
- (* Machine can be customized as per customer need)

Heavy Duty Steel Coil

CRGO Steel Coil

Steel Wire

Copper Coil

Customized Coil Wrapping Machine

At WinTech Packaging, we offers the flexibility to customize automatic coil wrapping machines to seamlessly integrate with your coil slitting line. Our customized solutions allow for direct connection from the coil slitting line to the infeed power roller conveyor system of the automatic horizontal coil wrapping machine, creating a streamlined and efficient production process.

Bearing

MS Strips Coil

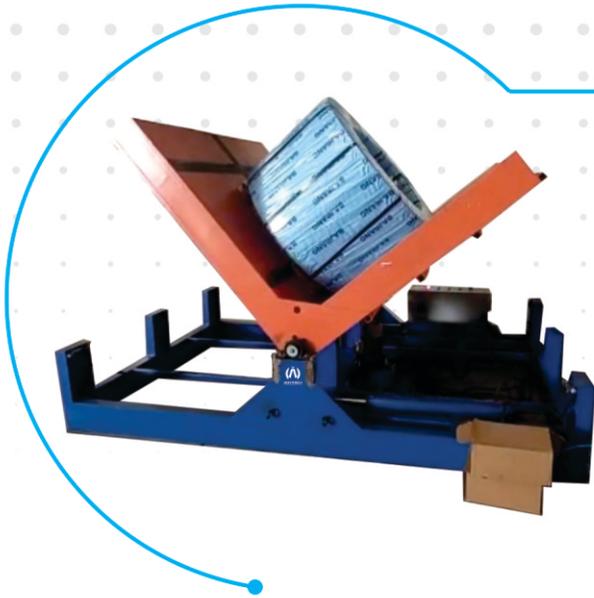

Pet Strap Roll

Copper Strips Coil

Coil Tilter Machine / Upender Machine

Experience seamless and error-free load turning with our advanced and secure custom load handling solutions. Our power pack machines are designed to ensure efficient and safe load handling, eliminating the risk of product damage. With the ability to seamlessly change positions from vertical to horizontal or vice versa, our machines provide unparalleled versatility and reliability.

(* Machine can be customized as per customer need)

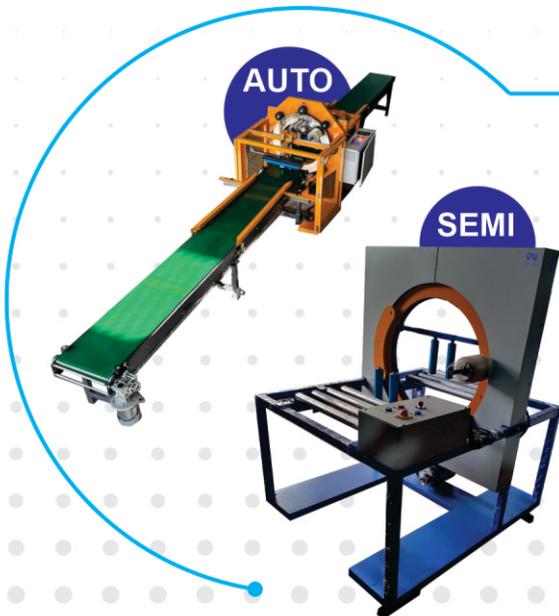

Outer to Outer Stretch Coil Wrapping Machine

This outer-to-outer coil stretch wrapping machine is perfect for wrapping Products such as non-woven fabrics, coils, paper rolls, rubber products, and similar items produced in small reels. Due to their small inner diameter, these items cannot be wrapped from the inside to out. That's why this outer to outer stretch machine can be used for Wrapping. To wrap a product, the operator places it on the turntable between two rollers and activates the machine. This simplifies the wrapping process and ensures efficient and secure packaging.

(* Machine can be customized as per customer need)

Horizontal Ring Stretch Wrapping Machine

The Horizontal ring Stretch Wrapping Machine is a specialized packaging equipment designed to securely wrap long and bulky products, such as pipes, rods, tubes, and lumber, by orbiting the product with stretch film. This innovative machine rotates around the product, applying stretch film from four sites to ensure complete coverage and protection during transportation and storage. Ideal for industries such as construction, manufacturing, and logistics, the horizontal ring stretch wrapping machine offers efficiency, reliability, and versatility in packaging solutions. Its automated operation reduces labor costs and increases productivity, making it an essential asset for any business requiring efficient and secure packaging of long and irregularly shaped items.

(* Machine can be customized as per customer need)

Box Wrapping Machine

The Box Stretch Wrapping Machine is a specialized packaging solution designed to efficiently wrap boxes and cartons with stretch film for secure transportation and storage. This versatile machine applies stretch film around the box, ensuring stability and protection against damage during handling and shipping. Ideal for various industries, including logistics, distribution, and manufacturing, the box stretch wrapping machine streamlines the packaging process, reducing labor costs and increasing productivity. Its user-friendly design allows for easy operation and customization of wrapping parameters, making it an essential tool for businesses seeking reliable and efficient packaging solutions for their boxed products.

(* Machine can be customized as per customer need)

Case Erector

The Case Erector is a cutting-edge packaging machine designed to automate the process of erecting cardboard boxes for efficient and streamlined packaging operations. With precision engineering and intuitive controls, this versatile machine swiftly forms corrugated cases, reducing manual labor and increasing productivity. Ideal for industries such as e-commerce, food and beverage, and manufacturing, the case erector ensures consistent box assembly, enhancing the overall efficiency of packaging lines. Its compact design and user-friendly interface make it easy to integrate into existing production lines, making the case erector an indispensable asset for businesses seeking to optimize their packaging processes.

Specifications :

Power Supply : 3 phase

Box Size : L*W*H 200*200*200 mm min required

Box Output : 8 - 10/Min

Pallet Stretch Wrapping Machine

The Pallet Stretch Wrapping Machine is a sophisticated and efficient solution for securely wrapping palletized loads with stretch film. Designed to streamline the packaging process, this machine applies stretch film evenly around the pallet, providing stability and protection during transportation and storage. With customizable wrapping parameters and automated operation, it offers versatility and reliability for various industries, including logistics, warehousing, and manufacturing. The pallet stretch wrapping machine enhances productivity by reducing manual labor and ensuring consistent and uniform wrapping.

Specifications :

Power Supply : 1 phase / 3 phase

Pallet Load Dimension : 1200*1200 mm(L*W) /2100 mm (H) /1500 kg weight

Machine Turn Table Dia : 1700 mm

Speed : 12-15 RPM

Capacity : 09 -10 Pallet/hr

Start/Stop : frequency controlled

Stretch Film Ratio: 200 - 250%

(* Machine can be customized as per customer need)

Reel Stretch Wrapping Machine

The Reel Wrapping Machine is a specialized packaging solution designed to efficiently wrap reels of various materials, such as paper, plastic, or metal, with stretch film. This machine ensures the secure and uniform wrapping of reels, providing protection against damage during transportation and storage. With customizable settings and automated operation, it offers versatility and reliability for industries such as printing, packaging, and manufacturing. The reel wrapping machine streamlines the packaging process, reducing labor costs and increasing productivity. Its user-friendly interface and robust construction make it an essential tool for businesses seeking efficient and effective reel packaging solutions.

(* Machine can be customized as per customer need)

Radial Reel Stretch Wrapping Machine

The Radial Reel Wrapping Machine is a specialized packaging solution designed to efficiently wrap cylindrical reels of various materials, such as paper, plastic, or metal, with stretch film. Unlike traditional wrapping machines, the radial design allows for the reel to rotate around a central axis, ensuring even and consistent wrapping from radius sides. This innovative machine provides secure and uniform wrapping, protecting the reels against damage during transportation and storage. With customizable settings and automated operation, it offers versatility and reliability for industries such as printing, packaging, and manufacturing. The radial reel wrapping machine streamlines the packaging process, reducing labor costs and increasing productivity. Its user-friendly interface and robust construction make it an essential tool for businesses seeking efficient and effective reel packaging solutions.

(* Machine can be customized as per customer need)

Reel Cum Pallet Wrapping Machine

The Reel Cum Pallet Wrapping Machine is a versatile packaging solution designed to efficiently wrap both cylindrical reels and palletized loads with stretch film. This innovative machine combines the functionality of a reel wrapping machine and a pallet wrapping machine into one, allowing for seamless and convenient packaging of diverse products. With customizable settings and automated operation, it offers versatility and reliability for industries such as printing, packaging, and manufacturing. The reel cum pallet wrapping machine streamlines the packaging process, reducing labor costs and increasing productivity. Its user-friendly interface and robust construction make it an essential tool for businesses seeking efficient and effective packaging solutions for both reels and pallets.
