

What To Do After an Accident (EN/ES/HT)

Download Guide – Available in English, Spanish, and Haitian Creole

Getting into an accident is stressful and confusing, but knowing the right steps can protect your health, your rights, and your case. This guide walks you through what to do immediately after an accident and how Care Connect can support you every step of the way.

- **Ensure Safety First** – Move to a safe location if possible and call emergency services. Your safety and the safety of others comes first.
- **Get Medical Attention Right Away** – Even if you feel fine, some injuries show up hours or days later. Seeing a doctor immediately helps prevent long-term complications and creates a medical record for your case.
- **Gather & Document Evidence** – Take photos of the accident scene, your injuries, and any property damage. Exchange information with the other party and get contact details of witnesses if possible.
- **Report the Accident** – Call the police and file an official report. Notify your insurance company or employer (if work-related) as soon as possible.
- **Connect With Care Connect** – This is where we step in. We connect you to vetted lawyers and doctors who specialize in personal injury cases. From clean medical documentation to experienced legal guidance, we make sure nothing slips through the cracks so you can focus on healing.
