

BRIDGING DELIVERY & OUTCOMES

CYBER · AI · PRODUCT

ABOUT US

Hyland is a specialized delivery partner helping commercial technology organizations build and scale teams in Cyber, AI, and Product. We align every engagement to your business objectives and provide documented results, not just timesheets and invoices.

- Woman-Owned Small Business
- Active E-Verify Participant
- Located in Ashburn, Virginia; Providing nationwide support
- Specialized in AI, Cyber, and Product domains
- Building partnerships. Not VMS.

WHY HYLAND?

Outcome-Focused

Most staffing firms place someone and move on. That's not our model. As a true delivery partner, we take pride in staying engaged, ensuring our practitioners are meeting deliverables and contributing to your success.

Built for Tech

Deep domain experience in Cyber, AI, and Product. Practitioners who have done this before in complex, fast-moving, and high-stakes environments.

Cost-Effective

Lean and focused. A cost-effective alternative to large consulting firms without sacrificing quality or speed.

Long-Term Partnership

We build around relationships, not transactions. Project and team stability over revolving doors.

Flexible Engagement Models

Contract, Contract-to-hire, direct hire, or project based. We adapt to your hiring needs and timeline.

Quality Over Quantity

We are not here to flood your inbox. Through a consultative approach and a thorough vetting process, we deliver only the practitioners who fit; saving you time, money, and the cost of a bad hire.

CORE SPECIALIZATIONS

AI ENABLEMENT & DEPLOYMENT

- Strategy through deployment, from use case definition to production
- Agentic AI, LLM integration, and MLOps implementation
- Scaling AI beyond pilots into operational environments
- Practitioners who have deployed AI in production environments across enterprise and regulated industries

CYBERSECURITY

- Identity & Access Management (IAM/PAM) and Zero Trust architecture
- Cloud security, GRC, and continuous monitoring
- Alignment with industry frameworks including NIST, ISO 27001, and SOC 2
- SailPoint, Okta, and Radiant Logic implementation
- Practitioners with depth across compliance and real-world execution

PRODUCT STRATEGY & EXECUTION

- Helping commercial technology companies scale their product organizations and enter new markets.
- Product management, roadmap execution, and launch leadership
- Standing up product functions from scratch or strengthening existing ones
- Pre-sales engineering and solution architecture

OUR DELIVERY APPROACH

- **Aligned to Every Engagement** Every engagement starts the same way, with a conversation. We take a consultative approach to understanding the need, the culture, and the definition of success before a single practitioner is introduced. That foundation is what makes everything else work.
- **Documented Contributions** We don't disappear after we deliver. We stay in it, tracking and reporting contributions throughout the engagement. If something isn't working, we address it. That's the difference between a vendor and a partner.
- **Building Towards Outcomes** The market is shifting. AI strategies are reshaping how organizations reduce costs and increase productivity and the pressure to adapt is real. Hyland was built for this moment. Let us help you navigate that shift, and prove along the way that we're the partner worth keeping.
