PickYourHire

About Us:

At Pickyourhire, we're not just hiring developers—we're nurturing problem solvers and future tech leaders. Join us as we build a smart hiring platform that brings trust, privacy, and quality into tech recruitment.

What You'll Do:

- Build responsive and interactive web applications using HTML, CSS, and JavaScript.

- Work with backend frameworks (Node.js or Python) to create APIs and server logic.

- Integrate with databases and ensure smooth data handling (MongoDB/PostgreSQL).

- Participate in code reviews, learn from mentors, and continuously improve your skills.

What We're Looking For:

- Passion for coding and a portfolio of personal or academic projects.

- Basic knowledge of any backend language (Node.js, Python, etc.).

- Familiarity with Git and GitHub.

- Willingness to learn and adapt in a fast-paced startup environment.

Nice to Have (But Not Mandatory):

- Exposure to cloud platforms (Firebase, Vercel, Heroku).

- Understanding of RESTful APIs or GraphQL.

- Interest in DevOps or CI/CD pipelines.

Perks:

- Mentorship and learning-driven environment.

- Opportunity to grow into a full-time role and Flexible working hours.Be part of an early-stage tech platform with real-world impact.
