

NEDIA FIBER

WHO WE ARE

NEDIA Fiber is now supplying high-performance optical fiber cables across the Americas, strengthening the region's telecommunications infrastructure with cutting-edge, reliable connectivity solutions to meet growing demand.

FTTX

FTTx cables provide high-performance, reliable connections for last-mile network deployments, ideal for residential and business applications.

INDOOR

Indoor fiber optic cables are designed for flexible, high-speed data transfer within buildings, perfect for data centers and office networks.

UNDERGROUND DUCT

Underground duct cables are built for harsh environments, providing secure, long-distance connections in buried installations for large-scale infrastructure.

ADSS

Aerial fiber optic cables offer durable, high-speed connections for overhead network installations in both rural and urban environments.

MICRODUCT

Microduct cables are ideal for high-density, space-constrained installations, offering scalable solutions for urban fiber deployments.

MICROMODULE

Micromodule cables are compact, high-capacity solutions perfect for dense network environments where space is limited.

Industries We Serve

At NEDIA Fiber, we provide advanced fiber optic solutions tailored to the evolving needs of various industries. Committed to quality and sustainability, we deliver scalable, future-ready systems that ensure reliable connectivity and seamless operations.

Discover how our innovative technology is transforming communication and infrastructure across multiple sectors.

ISPs

High-speed broadband infrastructure.

Telecom Operators

Backbone & last-mile connectivity.

Data Centers

Ultra-high-capacity fiber networks.

Aviation & Transportation

Mission-critical communication systems.

Medical & Healthcare

Fiber for advanced medical imaging and diagnostics.

Maritime & Offshore

Secure and resilient fiber networks for offshore facilities.

ISO Certifications

Our products are designed and manufactured in facilities certified to meet the highest international quality management standards. We produce our own optical fibers using state-of-the-art technology, ensuring compliance with the most demanding certifications and industry requirements.

- Certified for Quality Management Systems ISO 9001:2015
- Certified for TL-9000 R5.5/5.0H
- Certified for the Environment Management System ISO 14001:2015
- Certified for the Competence of Testing & Calibration Laboratories ISO/IEC 17025:2017
- Certified for the Occupational Health and Safety Management System OHSAS 18001:2007
- Certified for the Information Security Management System ISO 27001:2013
- ISO 45001:2018 Certified for the OHAS – Occupational Health and Safety Management System
- ISO 22301 Certified for the Business Continuity Management System

SUSTAINABLE DEVELOPMENT GOALS

Sustainability

We understand the importance of preserving our planet for future generations. NEDIA Fiber is committed to sustainable practices across all facets of our business. We integrate sustainability into every decision we make. By prioritizing green initiatives, we aim to contribute to a cleaner, more sustainable future while supplying the high-quality products our customers expect.
