

Migrate to a Dedicated Server and Multi-Tenant VMware Environment

"No problem is left unsolved!"

- Jerald Huff, Chief Technology Officer at MyWebsiteSpot

Company Name

MyWebsiteSpot

Industry

- 💧 Software
- 💧 IT Services and IT Consulting
- 💧 Search Engine Optimization - SEO

Products

- 💧 Managed Hosting
- 💧 Multi Complex
- 💧 Traditional Dedicated Bundle
- 💧 2 Node VMware
- 💧 Server - Upgrade Wave 2
- 💧 Multitenant VMware

Company Pain Points

MyWebsiteSpot started with VMware, an excellent choice for many renowned hosting companies. But MyWebsiteSpot was running into several problems with resource monopolization, scaling, and reducing operating costs.

The pain points they experienced were:

- 💧 Wanted to scale and expand for clients' needs
- 💧 Better utilization of resources and flexibility for heavy traffic days
- 💧 Very admin focused
- 💧 Already had five dedicated servers

How Liquid Web Helped

By moving MyWebsiteSpot to a Multi-tenant VMware Private Cloud, they could scale and expand, allocate resources to their customers, and reduce operating costs.

MyWebsiteSpot is a web design and development company. Jerald Huff, Chief Technology Officer at MyWebsiteSpot, realized the need to scale to meet their customer's needs. Akmal Grant, Partner Development Manager at Liquid Web, came up with the solution of consolidating the systems and migrating them to a Multi-Tenant VMware Environment.

He stated, "Why not consolidate into a VMware system so you can have the flexibility and control to create VPS of all shapes and sizes that can compete with the resource spend." Huff was more than happy to run with that idea.

The Dedicated Multi-Tenant VMware environment was able to help MyWebsiteSpot's needs:

Scalability

You can clone data centers or configurations and deploy them to multiple customers.

Resources

Dedicated VMware performs better because there are no shared resources, allowing you to customize more of your environment.

Huff was thrilled with the outcome: "Not only are they responsive and skilled, but they take the time to consult me through the solution." Huff even has plans to expand further with Liquid Web.

Pros of Running a Multi-Tenant Environment

Multi-tenant environments have proven to be very popular with smaller companies that need fewer dedicated resources due to a few key benefits:

Low Cost

Solutions with a VMware multi-tenant design use shared resources to lower per-user costs while keeping the environment for every user separate at the same time.

Efficiency

It's much more likely for resources to be utilized fully in multi-tenant environments than in single-tenant ones.

Setup

Because multi-tenant environments are not as customized, the onboarding process is usually faster and more accessible for everyone. For example, Liquid Web's Multi-Tenant VMware Private Cloud has same-day availability.

Migrate to a Dedicated Server and Multi-Tenant VMware Environment *Continued...*

Maintenance

In multi-tenant environments, the solution provider usually handles the updates.

What Works For You

Whether you're consolidating resources to reduce costs; modernizing your infrastructure to better serve customers through increased performance, reliability, and security; or simply adding scalability to better position your business for future growth, Multi-tenant VMware Private Cloud might be the perfect solution for you.

About Liquid Web

Building on 25 years of success, our Liquid Web Family of Brands delivers software, solutions, and managed services for mission-critical sites, stores, and applications to SMBs and the designers, developers, and agencies who create for them.

Liquid Web (Managed Hosting), Nexcess (Digital Commerce Cloud), and StellarWP (WordPress Software and Tools) have more than 500,000 sites under management, over 125,000 software subscribers, and two million+ free version software users. Collectively, the companies have assembled a world-class team of industry experts, provide unparalleled service from solution engineers available 24/7/365, and own and manage 10 global data centers.

As an industry leader in customer service, the rapidly expanding brand family has been recognized among INC. Magazine's 5,000 Fastest-Growing Companies for twelve years.
