

WHAT IS IN THE BOX

GENERAL

Batteries compatibility	Compatible with Elios batteries
Operating temperatures	0 °C to 50 °C (32 °F to 122 °F), similar to Elios

CABLES

Connection	Length	Description
Remote to power module	2 meters	Connects the remote controller to the power module for stable signal transmission.
Power module to antenna	20 meters	Links the power module to the antenna module, extending range and ensuring strong connectivity throughout operations.

ANTENNA MODULE

Integrated antennas	Built-in antennas ensure seamless signal transmission and reliable performance.
Reflective stickers	Improves visibility in low-light environments for quick identification.
Easy extraction	Engineered for effortless removal and repositioning during operations.

POWER MODULE

Battery level indicator	Provides real-time battery monitoring and low-battery warnings.
Secure attachment system	Features a buckle for easy and stable mounting in various environments.
Convenient battery slot	Includes a strap-secured slot for quick and reliable battery placement.
