Middle Primary Beginner English

Correct the word in bold for spelling and each underlined word for grammar. Write the correct word in the boxes provided.

Many people think that dolphins are fishes because they look like a fish.

Another reason is because they are **marin** animals.

However, in **aktual** fact, dolphins are mammals, just like us.

Like us, dolphins have an pair of lungs. The difference

among us and dolphins is that we breathe through our

nostrils while dolphins breathe through a blowhole on the top of their

heads. Unlike fishes, dolphins do not **posess** gills.

Fortunately, dolphins can hold its breath for up to fifteen

minutes. This gives them **suficient** time to dive deep into the sea to feed on fish and other marine animals.

Unlike most wild animals, dolphins are rather friendly **cretures**

. They often swim near boats, **display** no

fear of fishermen. Unfortunately, this is also part of the reason for the

deaths of dolphins - they get catch in fishing nets.

Today, many countries are working together to preserve these beautiful mammals.
