

About Me

Ryan Toor

I am currently a Year 11 student and councillor at my college, with notable accomplishments in academics, creative writing, and leadership. As a passionate mentor and community advocate, I am committed to academic excellence. I am honoured to have been appointed College Captain for Year 12, a role through which I aim to inspire and lead my peers toward success and positive community engagement.

I have always had a strong passion for maths, science, and creative writing. My dedication has earned me first place in the Western Australian Junior Maths Olympiad at UWA, a perfect score in the International Chemistry Quiz, and first place at the York Festival for creative writing. These achievements reflect my commitment to both academic excellence and creative expression.

Beyond my own accomplishments, I am passionate about helping others, especially young learners in early childhood and primary school. Through my educational platform, Our Learning Community, I provide free resources designed to build confidence and support foundational learning in maths and literacy. My goal is to create an inclusive and encouraging environment where all children can develop essential skills and a lifelong love of learning.

Apart from academics, I have a passion for playing competitive table tennis and actively advocate for the community to get involved in the sport and enjoy its many benefits. I also love taking part in fundraisers and giving back to the community, as I believe that supporting others helps build a caring and connected society.
