

Earth's Surface Changes

Upper Primary Beginner Science

Match each word from the word bank to their definitions.

Weathering

Landform

Deposition

Sediment

Erosion

1. The dropping of rocks and soil in a new place. _____
2. A natural shape or feature on Earth's surface, like a cliff or valley. _____
3. Small bits of rock, sand or soil that have been broken down. _____
4. The breaking down of rocks into smaller pieces. _____
5. The movement of rock and soil from one place to another. _____
6. Explain what happens to the beach shore. _____

Earth's Surface Changes - Solutions

Upper Primary Beginner Science

Match each word from the word bank to their definitions.

Weathering

Landform

Deposition

Sediment

Erosion

1. The dropping of rocks and soil in a new place.

Deposition

2. A natural shape or feature on Earth's surface, like a cliff or valley.

Landform

3. Small bits of rock, sand or soil that have been broken down.

Sediment

4. The breaking down of rocks into smaller pieces.

Weathering

5. The movement of rock and soil from one place to another.

Erosion

6. Explain what happens to the beach shore.

Waves crash against large rocks on the beach, breaking small pieces off into pebbles and sand through constant pounding. This shows weathering (rocks breaking down in place) and erosion (pieces being worn away and moved by water.)
