

Editing Exercise 1

Upper Primary Beginner English

Australian mangoes grow in warm places

like queensland.

There

taste sweet and juicy. People eat them mainly in summer.

Farmers pick rip

mangoes from tall trees. There are

many kinds, like Kensington Pride ant

Calypso.

These mangoes have colourfool

skins that turn yellow

and red. childrun

love slicing them for school lunches.

Mango trees need lots of sonshin

to grow big fruits.

Mangoes are packed with witamins

that make us strong.

You can blend them into delcous

smoothies. Farmers

use ladders to rich

the highest branches.

Australia grows some of the best mangoes in the world!
