# THE CONCEPT

The concept of SLA started when two designers went looking for a new home. They quickly realized the landscape of apartment rentals in Seoul had little options and even less style. They envisioned New York style loft living but faced limited options for rent. So the designers decided to do what they do best and created their own unique living space. They set out to create something that reflected the dynamic heart of Seoul and the culture of the area, with inviting public spaces and bright open concept living. The designers set out to create apartments that were humble yet sophisticated, all with individual character. They had a driving ethos of loft style open concept living with a home like feeling.

After many long nights creating and building, what emerged from these long hours was the start of Seoul Loft Apartments (SLA). SLA now rents fully furnished apartments offering a home away from home. Apartments offer some hotel comforts with a contemporary feel. Think industrial chic meets Bali. The interior design employs materials such as concrete, custom wood furniture and unique interior elements appropriated from traveling. The designers used of high contrast of light and darks tones are present throughout the building. The result in a very cozy, elegant atmosphere that is unpretentious, functional and above all livable.

# A SERVICED RESIDENCE FOR YOUR EXTENDED STAY.

Experience style, culture and convenience unparalleled to any downtown residence. With 28 fully furnished apartments, studios, suites, one/two bedrooms, and duplex lofts. Lofts have open floor plans, modern entertainment systems and fully equipped kitchens. More than just four walls, you will feel at home. Apartments offer spacious living in the heart of Seoul, Jongno gu with quality, service and care.
