UNDERSTANDING INTERNATIONAL TRADE PROCEDURES

Potential Buyers of Petroleum products from manufacturers need to understand what the Sellers are looking for from a Buyer BEFORE engaging in any transaction. This will ensure a successful lift and minimize the possibility of failure.

1. Pricing is "refinery direct" and is not connected to Platts, which is based upon "traders" prices.
2. These refineries have proven themselves in the business for years and have delivered fuels of all types for decades, successfully.
3. Manufacturers have a **massive investment** in their fuels through refining, transporting, and storing them at the major ports around the world, so they expect Buyers to make a similar investment before transferring the product to them.
4. Thus, manufacturers do not provide proof of product (POP) for free. Buyers must demonstrate an investment in the ability to receive fuel prior to receiving POP in a transaction, regardless of procedure.
5. These investments are generally paid to 3rd party logistics providers and **not** to the manufacturers themselves unless the procedure calls for a Tank Extension. Manufacturers generally take no fees and only make money by **selling fuel**.
6. This policy favors Buyers with currently rented tanks, which is a de facto demonstration of an investment in the ability to receive fuel once POP is approved.
7. Manufacturers' Procedures **cannot** be changed in any way. **Do not attempt** to negotiate the Procedure once a transaction starts. This will **only** lead to cancellation.
8. Do your due diligence beforehand.

Finally: An ICPO is an order. It is **not** an opportunity to negotiate the Procedure. It is important for the Buyer to have a contract with the Logistics Company directly and not a third party. Refrain from substituting Logistics Companies in the middle of a transaction as it would be considered as a **potential risk**. It is assumed that you are ready to transact. Make sure you understand what is required of you in any given Procedure and you will receive Proof of Product at the appropriate point in the procedure and not beforehand.
