

Thank you, Mayor Stevens, and everyone on the Baltimore city council. It is a great honor to be here to dedicate this statue of my grandfather on the twenty-fifth anniversary of the Bird Flu Genocide. For those of you too young to remember the events of that horrific year, my grandfather saved the world.

At a time when a killer disease and racial hatred were about to destroy mankind, he ended the disease and the hatred. He didn't do it single-handedly; it took the work of thousands of unnamed heroes. Historians call grandfather 'the Paul Revere of our time.' Like the Revolutionary War hero, grandfather gave the call to action that motivated the thousands of heroes to fight back.

What few people have heard is the speech in which he uttered his world-changing rally cry. Before history forgets, I'd like to present his testimony in its entirety.

* = * = *

I come to you today as one of the few healthy black men in America. If you, the surviving members of Congress, don't act soon, there won't be any people of color left in this great country. The diversity that makes us strong will be gone.

As the Speaker of the House said, my name is Dr. Garvey Samuels, and I lead the task force fighting the H5N1 influenza epidemic. H5N1 is the name of the virus causing the Asian Bird Flu, which has ravaged the world these last four months. I'm standing here today only because my position grants me access to an effective vaccination serum. Our poor people, most of whom are non-whites, are still being treated with surplus stocks of Amantadine, which is ineffective. The country is dying and we're trying to save a few dollars!

Experts like myself at EIS. That's the Centers for Disease Control's Epidemic Intelligence Service. Predicted the H5N1 virus could be as deadly as the 1918 Spanish Flu. Estimates put the death toll between 150 million people, on the low end, to 360 million people worldwide over a six-month period. Since the first reported fatality five months ago, the death toll is over 700 million and rising. The United States has been "fortunate" with only fifty-six million deaths. Those numbers are sure to climb, because estimates put infection rates among the urban poor at seventy percent or more.

According to our pre-epidemic models, once the virus mutated so human-to-human transmission was possible, it might spread around the globe. Modern air travel has always been the most likely vector for the disease. What we didn't count on was the calculated use of air travel to deliberately spread the disease. You heard me right, Congress members. The disease is being purposely spread around the globe.

The reason for my testimony today is to provide proof that the aggressive spread of Asian Bird Flu among non-whites, here and overseas, is part of a conspiracy. It's a

conspiracy that has so infiltrated the medical and law enforcement communities that only Congress, through this proposed legislation, can stop it.

At the dawn of the century, Congress declared war on terror. There is a new battlefield, and it's inside our own borders. The spearhead of this terror conspiracy is a "church" known as the World Church of White Christ Fellowship. In reality, they are an apocalypse cult. Only recently have we learned they are secretly funded and backed by a coalition of white supremacy organizations. The hidden association succeeded in keeping members off FBI watch lists for hate groups.

All the information collected on this cult can be found in the reports distributed to each of you. So rather than continue to tell you what you can read, I'd like to read a transcript excerpt. This transcript was taken from the secretly recorded interrogation of a cult member who turned himself in at a quarantine center run by Washington State University in Spokane. It is more chilling than any facts or figures I could present to you.

Interrogator: For the record, please state your name.

Detainee: Joseph White. Look, I already gave this information to the Negro feller yesterday.

Interrogator: I'm sorry, you'll need to repeat it. He was transferred for...disciplinary reasons. Besides, I understand you know some things that might upset colored folks.

Detainee: Yes, sir. I know why so many of them is dying from the bird flu. It's cause of people from my church, the White Christ Fellowship.

Interrogator: Your church is killing people? Doesn't sound like something a church would do. How did you get involved in this church?

Detainee: I dropped out of high school when I was fifteen. Jobs is hard to come by without a diploma or GED. Mexicans and Blacks always got priority for jobs 'cause of Affirmative Action. The WCF was helpin' poor folks like myself by getting us jobs. They helped me out so I felt obligated to help them out. Joined the church and became a Christian Soldier. But, I never wanted to be killing nobody.

Interrogator: So you've had a tough life and the WCF helped you. Explain to me how helping poor white people leads you to believe they want to kill all non-whites.

Detainee: The church believes in racial purity. God separated the light from the dark. Light is white, like the light from the sun, the moon, and the stars. That means white folks is from the world of light and other races are from the world of darkness, the world of Satan.

Interrogator: There are good colored people and bad white people. What makes them think whites are better?

Detainee: I said that very same thing myself. They explained to me that Jesus was white, all the Popes were white, and every President has been white. They say the Constitution is a holy document inspired by God because it says all white males have sovereignty over the land and other races. Slavery is allowed in the Constitution, they showed me.

Interrogator: You said you joined the church and became a "Christian Soldier." What were you expected to do as a Christian Soldier? Aren't soldiers supposed to kill people?

Detainee: The job of a Christian Soldier is to protect white folks during the coming RaHoWa--

Interrogator: The Rahowa?

Detainee: Racial Holy War, the war between the whites and non-whites before the Apocalypse in 2012. We gotta get rid of the impure races before Jesus can return.

Honorable Congress members, as disturbing as his beliefs may be, they are protected under the constitutional amendments on free speech and religion. Preaching them is not a crime and the next couple of pages are a recitation about how this racial war is supposed to bring about the Apocalypse. He goes on about the formation of a Pan-Aryan society built on the ashes of the world.

Senator Danwright: Has anyone interviewed the black gentleman this man mentioned in the beginning:

We've been unable to locate him, Senator. The interrogator was correct that he was transferred but no one knows where. Federal agents checked his residence. It was cleaned out and no forwarding address was left.

If I may, I'd like to skip forward to the details of how white supremacy organizations planned to win the racial war. This is where belief turns into criminal actions.

Interrogator: What was the purpose of recruiting airline pilots and customs agents into the church?

Detainee: Lots of members are doctors. Pilots and airport workers would help sneak the doctors in and out of the country through Seattle International Airport.

Interrogator: Sneak them where?

Detainee: To countries with the Asian Bird Flu. The doctors were supposed to get infected and then travel to non-white countries in Asia, South America, and Africa to spread it by pretending to help.

Interrogator: Why was Seattle airport so important?

Detainee: 'Cause a lot of Asians travel through SeaTac. But it's not just Seattle, it's Denver, Chicago and Boston too. They're airline hubs in cold places where someone with flu symptoms won't get too much attention. Infected people could slip through, and with our pilots and customs officials there, they wouldn't get reported neither.

Mr. White's last statement shows proof the cult knowingly circumvented laws put in place to impede the spread of contagious diseases. Under the Control of Communicable Disease CFR 42 Section 70.2, flight crews are required to report ill passengers in case they may be carrying a communicable disease. By traveling on aircraft staffed with their members, the contagious individuals were never reported.

Senator Jeffers: As I recall, those regulations give CDC authority to ground airlines that fail to comply. Why have we never heard of any airlines being grounded?

You are correct, Senator. The management of CDC felt it was too late for a grounding to serve any purpose. The regulations are not intended to punish airlines. Airlines are already going bankrupt as a result of the pandemic and grounding them would only further damage the global economy. That's why we never exercised that authority.

Senator Jeffers: Have you at least been able to identify the culprits?

Yes, sir. We obtained passenger information through the Department of Homeland Security's APIS, Advanced Passenger Information System. We've identified many of these contagious passengers; most do have doctors' credentials. We don't know why they chose to break their Hippocratic Oath this way. However, the FBI has reason to believe that some of their families may have been threatened. All the passengers linked to the cult are reported dead or stranded overseas with health conditions unknown.

My esteemed colleagues from the World Health Organization briefed you earlier on the millions already dying from AIDS, malaria, and starvation in Africa. On top of these long-term health crises, this cult purposely sent an army of Typhoid Mary's to spread the Asian Bird Flu! In Sub-Saharan Africa, there aren't enough living to bury the dead. On the scale of human tragedies, it's the Bubonic Plague all over again.

I'd like to read a final excerpt because it directly affects me. I've lost numerous members of my family and friends to H5N1. If this statement is true, then they were murdered.

Interrogator: What about the high rate of infections among African-Americans? I thought you said the infected people traveled to foreign countries.

Detainee: The pilots and customs agents eventually caught the Bird Flu from the doctors. Ever notice how many blacks work in airports? They caught the flu and took it back to their neighborhoods. The church leaders thought of everything, man. Please tell someone before it's too late to stop them!

Joseph White was held in quarantine for two weeks, far in excess of the four-day observation protocol. He repeatedly requested to speak to someone in authority. By law, an administrative hearing must be made within three business days upon request from the detainee. Personnel at the Spokane facility knowingly ignored his request.

So far, there have only been two arrests in connection to this incident. No one has been able to identify the interrogator. My FBI colleagues have reason to believe he was a converted federal agent sent by the church to find out what Mr. White knew.

We also believe involvement in the conspiracy reaches to upper management in the Washington center, and to branch offices of federal agencies like FEMA. There were no official reports filed within the CDC or FBI concerning this interrogation. I believe the

delay in his hearing, and Mr. White's suspicious death upon his release, are proof his confession was covered up.

More Joseph White's may be out there with information that can put a stop to this conspiracy. Please take action to end this deliberate attempt at genocide. I know the shadow of the Branch Dravidians still hangs heavy over the use of federal involvement. Organizations like the WCF have cloaked themselves in the guise of a church. They aren't practicing freedom of speech and religion anymore, but Nazism. They have launched an unholy crusade to exterminate every other race on the planet!

That is why today I call on you, I beg you, to pass the proposed legislation. We can't stop this epidemic until we can stop the vile racists that are spreading it. Hunt these organizations down for mass murder like we had the courage to do in World War II, Somalia, and Bosnia. If they wanted to spark a racial war, I say we try them for war crimes and crimes against humanity.

Until they are stopped, we must continue to battle against this epidemic. Increase the funding for my agency and others to immunize the poor, non-white communities in our great country. But don't stop there. Make this great nation a beacon to the world by providing effective drugs like Tamiflu where it's needed, and not where it can be paid for.

I have one final comment. Before the Asian Bird Flu, I called myself an African-American. It was a term many of my colleagues embraced as a way to set us apart. It did, but in a way we never expected.

Now I am simply an American. No hyphenated name will ever hide the color of a person's skin. Forgetting that we are Americans first and race second will always be divisive. The actions of these groups have shown me it's easier to hate someone who appears to be different. Hate like this killed six million Jews and we called it a Holocaust.

I refuse to give in to this hate! As one American, I stand before you on behalf of the lives of all Americans. Put an end to these hateful activities so my colleagues can stop H5N1 from ruining us all. What will future generations call this blatant act of racial cleansing if we do nothing? Will any good people be left to see it for what it truly is?

This disease and this cult have shaken my faith in the innate kindness in men for each other. We stand now at a turning point to influence the future of all mankind. Humanity will survive this deadly epidemic and rebuild like it always has. But if we don't address our hatred of our fellow man and fight it, that hatred will surely kill us all.

* = * = *

My grandfather taught me that the course of history often comes down to one man standing up and doing the right thing at a critical moment. He saw the biggest danger was in those spreading the disease rather than the disease. He died a few months ago a happy man, seeing a world united like the dream his hero Martin Luther King, Jr., spoke of over sixty years ago.

Grandfather's one regret was that millions had to die unnecessarily to achieve it. I've never known a world where people were treated differently for the color of their skin. As long as we remember my grandfather and his heroic generation, I never will.
