Introduction

Zelensky Token (\$ZEL) is not just another cryptocurrency; it's a symbol of resilience, leadership, and innovation, inspired by the remarkable legacy of Ukraine's President. Designed to redefine the future of decentralized finance (DeFi), \$ZEL empowers the community with unique features, constant utility, and a commitment to growth.

Key Features

1. Burn Mechanism: To ensure scarcity and drive value, \$ZEL incorporates an automatic burn mechanism every 48 hours.

2. Rapid Exchange Listings: \$ZEL is strategically positioned to launch on major exchanges, including Binance, Gate.io, and Coinbase, within the first 48 hours of its release.

3. Transparency and Trust: Fully audited smart contracts for enhanced security and clear roadmap milestones.

4. Community-Driven: \$ZEL emphasizes community involvement, allowing token holders to vote on key decisions.

5. Sustainability: A portion of every transaction fee is allocated to initiatives supporting global humanitarian efforts.

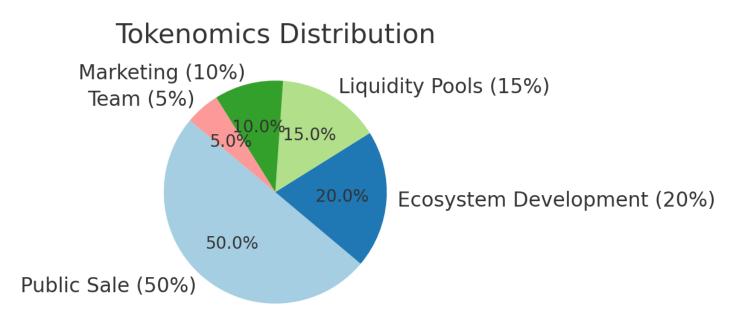

Tokenomics

Total Supply: 1,000,000,000 \$ZEL

Burn Rate: 2% of every transaction + scheduled burns every 48 hours.

Initial Distribution:

- 50% for public sale.
- 20% for ecosystem development.
- 15% for liquidity pools.
- 10% for marketing and partnerships.

Roadmap

- Phase 1: Token Launch (Week 1)
- Smart contract deployment and audit completion.
- \$ZEL token listing on PancakeSwap/Uniswap for initial liquidity.
- Social media campaigns to build awareness.

Phase 2: Major Exchange Listings (Week 2)

- Listings on Binance, Gate.io, Coinbase, and other exchanges.
- Partnerships with influencers and media outlets.

Phase 3: Ecosystem Expansion (Months 1-3)

- Launch of staking and farming opportunities to reward holders.
- Introduction of NFT collections tied to \$ZEL for added utility.
- Development of a mobile app for seamless transactions and governance participation.

Phase 4: Community and Utility Growth (Months 4-6)
