### "New project within the framework of 'Green UNEC' initiated by UNEC students."

The students of UNEC, in order to present a gift to mark the "Green UNEC" year have prepared interesting model compositions using household waste.

Models prepared by students of the UNEC Design School were evaluated by a panel of judges, determining the winners.

It should be noted that the purpose of the project is to protect the environment by using household waste, create a healthy and clean environment, and encourage the optimization of resource recovery through reuse.
