

FERTILIZER SOLUTIONS

INTELLIGENT SUPPLY |
SUSTAINABLE GROWTH

2025

WHO ARE WE?

Infinitem Venturis specializes in providing high-quality fertilizer solutions to global markets. Working closely with certified producers in Canada and trusted international buyers, we optimize agricultural trade to support food security and sustainable development. Our integrated supply chain features strong regulatory compliance, expertise in global logistics, and partnerships with leading institutions such as Export Development Canada (EDC).

From large-scale national programs to tailored seasonal sourcing, we offer fertilizer solutions designed for growth, productivity, and prosperity.

Consult with us today. Let's build your fertilizer supply chain.

TYPES OF FERTILIZERS BROKERED

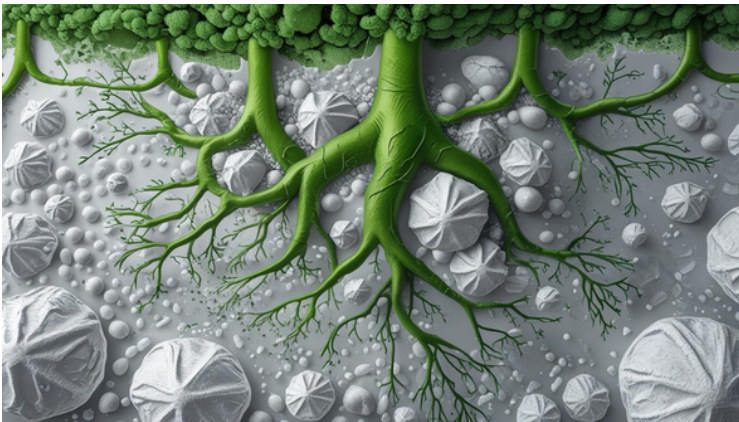

Urea (46%N)

- High nitrogen content for leaf and stem growth. Ideal for staple crops.

DAP (Diammonium Phosphate)

- it promotes root development and the early stages of growth

NPK (Proportionate Mixed varieties)

- Balanced formulations suitable for diverse soil needs.

MOP (Muriate of Potash / Potassium Chloride)

- it improves drought resistance, flowering, and fruit quality.

TYPES OF FERTILIZERS BROKERED

Organic Compost and Special Blends

- Environmentally friendly, it improves soil health.

At Infinitum Venturis, we specialize in the global brokerage of high-quality agricultural fertilizers tailored to meet diverse crop and soil requirements. Our portfolio includes Urea (46% N), NPK blends (customizable ratios), DAP (Diammonium Phosphate), MAP (Monoammonium Phosphate), Potassium Sulfate, Ammonium Sulfate, and organic fertilizers suitable for conventional and organic farming. Through our global supplier network, we can secure volumes ranging from small trial orders of 100 metric tons to bulk shipments exceeding 10,000 metric tons, delivered CIF or FOB depending on client preference. All products are compliant with international quality and safety standards, supported by full documentation including COA, SDS, packing list, and phytosanitary certification upon request.

Applications and Sectors Served

Commercial Agriculture

At Infinitum Venturis, we support commercial agriculture operations by providing reliable access to high-quality fertilizers sourced from certified global suppliers. Our brokerage service ensures competitive pricing, consistent supply, and tailored solutions to help agribusinesses maximize yield and profitability.

Soil Restoration Programs

Infinitum Venturis helps companies restore soil health through customized soil restoration programs that incorporate nutrient-balanced fertilizers, regenerative practices, and sustainable sourcing. By aligning agronomic strategy with long-term productivity goals, we enable our clients to rebuild soil vitality, increase carbon retention, and improve crop resilience.

Horticulture and Specialized Agriculture

Infinitum Venturis supports horticulture and specialized agriculture producers with premium-grade fertilizers tailored to the unique nutrient demands of fruits, vegetables, and high-value crops. Our solutions help optimize plant health, increase yield quality, and sustain year-round cultivation through precision inputs and expert advisory services.

How It Is Supplied

Bag Sizes

- Secure packaging in 25kg, 40kg, or 50kg polypropylene bags (customizable on request)
- Bulk shipments available in jumbo bags or containerized loose loading

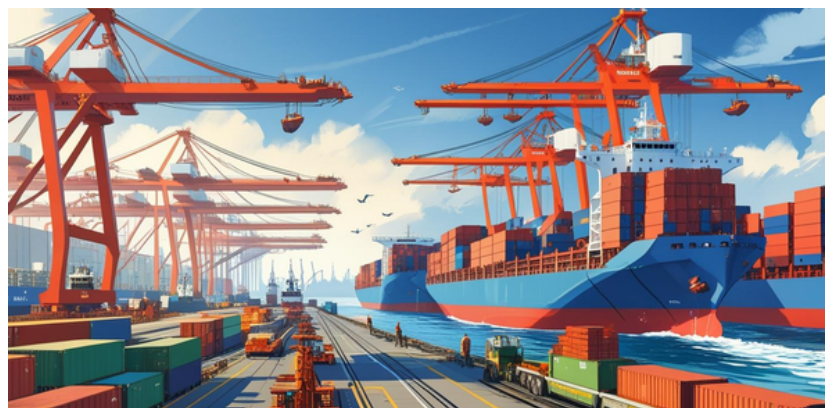

Origin Ports

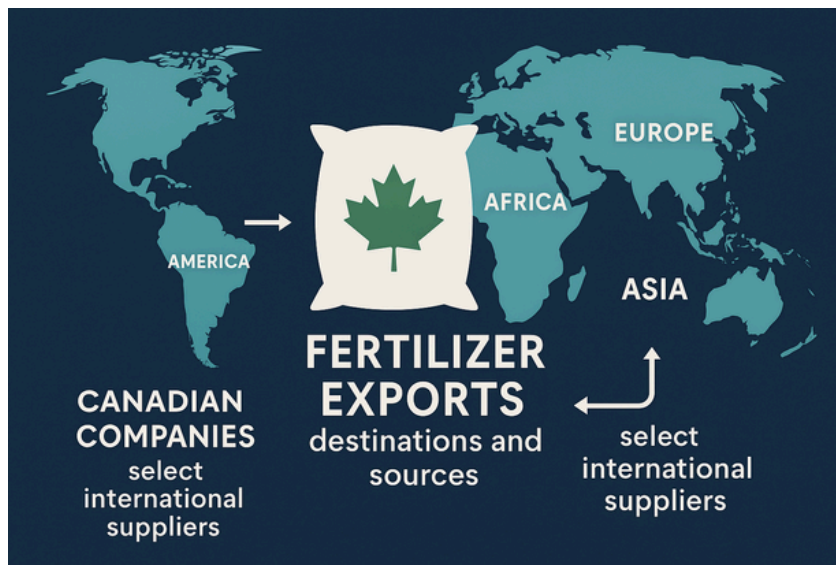

- Loading inspection and photographic evidence provided before dispatch
- Full shipping documentation: Packing List, Commercial Invoice, Certificate of Origin, Phytosanitary Certificate (if applicable)
- CIF, FOB, and DDP incoterms available
- Global delivery capabilities with support for port clearance coordination

Sending Methods

- Moisture-resistant, UV-protected, and tamper-evident sealing for product integrity
- Palletized and shrink-wrapped for safe handling and optimized container loading
- Custom labeling available to meet buyer, regulatory, or language requirements
- Shipping via sea freight (FCL/LCL), air freight, or rail—depending on urgency and volume

The Supply Chain | Exporting Regions

We export high-quality fertilizers from trusted Canadian producers to clients across Asia, Africa, South America, and Europe. In addition to our strong domestic sourcing network, we also collaborate with select international suppliers to ensure consistent availability, competitive pricing, and customized solutions tailored to each region's agricultural needs. Our global logistics partners and port facilities across Canada allow us to deliver efficiently and reliably to major markets worldwide.
