

CEDSTUNT

CEDSTUNT - Action Unit & Stunt Experts Based in Morocco

CEDSTUNT is a professional stunt company operating in the film and television industry, based in Morocco and working internationally.

-Who We Are-

CEDSTUNT was founded in 2000 by Cédric Proust, who began working with horses at a very young age under the guidance of his father, a recognised horse-master.

Combining horseback-based stunts, mechanical action and fight choreography, CEDSTUNT gathers a multidisciplinary team capable of delivering complex sequences involving animals, vehicles, and stunt performers.

Our Strengths & Offerings

Expert Stunt Team

Our team includes a broad roster of experienced stunt performers, trained to handle action scenes, horseback stunts, fight sequences and coordinated stunts for film or television productions.

Horses, Camels & Desert-Ready Animals

CEDSTUNT maintains a stable of approximately 30 specially trained Arab-Barb and Spanish horses, alongside camels from Mali. These animals are trained for cinematic stunts, mounted sequences and desert-setting scenes.

This unique offering allows productions to shoot authentic equestrian and desert sequences – from chases to large-scale action scenes – with professional rigour and animal welfare in mind.

Technical Resources & Tracking Vehicles

In addition to stunt performers and trained animals, CEDSTUNT provides specialized technical assistance and a fleet of tracking and support vehicles equipped for filming dynamic action sequences (car chases, moving shots, tracking-vehicle cinematography, etc.).

This gives film crews greater autonomy and flexibility to capture high-quality, cinematic shots in challenging environments such as desert landscapes.

Mechanical Animals in Cinema - CEDSTUNT's Expertise

Mechanical animals have become an essential tool in modern filmmaking, allowing productions to create dynamic, realistic and safe action sequences involving creatures that may be difficult or dangerous to use in real conditions. These advanced animatronic systems are designed to replicate natural movement, physical reactions and interaction with actors, while offering total control to the stunt and effects teams.

CEDSTUNT has developed a strong expertise in this highly specialised domain. Thanks to years of experience working with real horses, camels and desert-trained animals, the company fully understands the biomechanics, behaviour and physical presence required to make a mechanical animal look authentic on screen. This unique background enables CEDSTUNT to collaborate effectively with mechanical effects teams, ensuring that every movement – from galloping legs to body reactions and mounted action – matches the expectations of directors and cinematographers.

With CEDSTUNT, productions benefit from a partner that blends stunt expertise, equestrian mastery and mechanical-effects understanding, delivering action scenes that remain both believable and technically flawless.

Facilities, Stables & Animal Training - CEDSTUNT's Equestrian Excellence in Morocco

CEDSTUNT operates from dedicated facilities in Morocco designed specifically for the preparation, training and management of horses and camels for the film industry. Located in Marrakech, these stables provide the perfect environment for developing animals capable of performing safely and convincingly in cinematic action sequences.

The company maintains a high-quality selection of Arab-Barb, Spanish horses and trained camels, chosen for their temperament, endurance and physical adaptability. Each animal undergoes a specialised training program focused on film requirements: desensitisation to cameras and equipment, exposure to crowds and noise, mounted combat techniques, precision riding, and controlled reactions for high-impact scenes.

These facilities are managed by experienced trainers who understand both traditional horsemanship and the specific needs of the film industry. Their work ensures that each horse or camel can perform confidently in demanding environments such as desert terrains, large-scale sets or fast-paced action sequences.

Cedstunt: Autonomous, High-Standard Animal Transport & Popup Stables Solutions

Cedstunt delivers a fully integrated, technical approach to animal logistics in Morocco, offering independent, secure, and professionally engineered transport solutions for horses and camels. Our operations are designed for reliability, precision, and full autonomy—no external providers, no compromises.

Engineered Transport Systems

We deploy custom-built trailers and mobile units designed specifically for the biomechanical needs of equines and camels. Each unit is equipped with:

Shock-absorbing chassis for stable movement on both road and off-road terrain

Temperature-controlled ventilation adapted to Moroccan climate constraints

Anti-slip flooring and reinforced partitions ensuring structural safety during motion

Independent power systems guaranteeing constant functionality even in remote areas

Operational Independence

Cedstunt manages every stage internally—planning, logistics, loading protocols, route engineering, and animal supervision. This eliminates weak links and ensures:

Faster deployment

Adaptability for film productions, stunt operations, or long-distance transfers

Animal Welfare at the Core

Our procedures prioritize stress reduction and physical integrity.

Why Choose CEDSTUNT

Decades of Expertise: With over 20 years of experience since its founding, CEDSTUNT has built a deep knowledge of stunt coordination, animal handling, and technical filmmaking requirements under demanding conditions.

Comprehensive Action Services: From horseback stunts to mechanical effects and tracking-vehicle cinematography, CEDSTUNT offers a complete package to cover all aspects of action production animals, stunts, vehicles, logistics.

Authentic Desert & Equestrian Scenes

Based in Morocco, with access to desert landscapes and trained horses/camels, CEDSTUNT is uniquely positioned to deliver authentic and visually rich scenes for productions that require desert, historical or epic-style cinematography.

International Standards & Professionalism: The team's training, equipment and coordination reflect professional international standards, making CEDSTUNT a reliable partner for both local and international film productions.

Access to the Media Library

Discover our complete collection of photos and videos showcasing our work, animals, action setups and behind-the-scenes material.

This Google Drive library provides high-quality visuals available for production teams, partners and collaborators.
