DODGE SCARAB

The Dodge Scarab is a one-of-a-kind camera car engineered to transport large camera cranes to even the most demanding locations. Built on the sturdy Dodge V8 5.9L chassis, it offers a seamless blend of power and versatility, making it an ideal choice for challenging film productions.

DODGE SCARAB

- It can cope any terrain (Dunes, Rocky, hilly, dusty, muddy, snowy) .
- Huge loading capacities.
- Very Modulable (support wide range of heavy cranes)
- Very Safe

RIG SGSTRUCTURE

The Scarab is now available with an integrated rig structure option, engineered specifically for advanced stunt, camera, and special rigging applications. This modular aluminum truss system provides a strong yet lightweight platform for mounting equipment, safety systems, and dynamic stunt configurations while maintaining the Scarab's performance and mobility.

Designed for rapid deployment in demanding environments, the rig structure expands the Scarab's versatility on set, enabling complex action setups with maximum stability, precision, and safety. Fully customizable depending on production requirements, this option makes the Scarab a true multi-purpose stunt and filming platform.
