FORD RAPTOR V6.2 8L SVT

The Ford Raptor F150 SVT is a powerhouse camera car built for demanding shoots. This high-performance truck is equipped with a spacious double cab that comfortably seats 4 passengers plus the driver, while its rear platform can accommodate up to 5 additional crew members.

Renowned for its impressive towing capacity, the Raptor can easily A-frame other picture cars, as well as trucks and even armored military vehicles. Its versatile rear, and front platforms provide a stable base for operating any type of crane (up to a 35 foot crane) with maximum safety, making it the ideal choice for dynamic and challenging film environments.
