### POLARIS RANGER EV

The electric Ranger offers multiple mount and grip possibilities. It can obviously be used for any scene where silence is a key word as well as for chases with horses, camels and foot chase. It's a vehicle capable of a 35-mph max speed. Front, back and side mounts are easy to do with this multi terrain vehicle that can also welcome a mini Jib crane. A camera operator can decide where to seat or stand for shooting as the vehicle is fully equipped with cheese plates.
