### MOTORBIKE RIGSHOW

The Motorbike Rigshow is a camera and stunt rig designed for motorcycle scenes, allowing actors to safely simulate riding while the bike is controlled and stabilized by Cedstunt's towing and rig systems. It enables realistic riding performances without requiring the actor to actually ride the motorcycle, ensuring maximum safety while preserving authentic on-screen movement.

Compatible with all rolling vehicles and manually operable.

The rig can be used on any type of rolling vehicle and can also be manually pushed by camera assistants when required.
