TERRAIN

The ATV / Quad Sportsman 1000cc tracking vehicle can cope with any terrain, and is often used with a steady cam system. Efficient in narrow

MAX LOAD

The ATV / Quad has been build in order to welcome 3 persons. Usually, a camera operator and a focus operator are joining the pilot.

POLARIS SPORTSMAN 1000CC

The ATV / Quad Sportsman 1000cc tracking vehicle is as well a perfect puller for light charge. Chariots, mechanical horse, light low loader can be attached to the rear tow ball, making the actors and camera operator safe while supposed to ride at top speed.

POLARIS SPORTSMAN 1000CC + BLACK ARM

The Black arm is a 3-axis dampening system with a additional vibration mount for stabilizing roll and tilt errors as well as vertical motion and vibrations. The Black arm is a hardmount system, made for gimbals, that you want to mount on vehicles such as cars, ATVs, boats, snowmobiles.
