Summary

Highly skilled Odoo Python Developer with 5.5+ Years of experience in designing, customizing, and implementing Odoo ERP

solutions. Proficient in developing and integrating modules, conducting database management, and optimizing system

performance. Adept at collaborating with cross-functional teams and clients to understand business needs and deliver

tailored solutions. Strong expertise in front-end and back-end development, as well as API integrations with third-party

systems. Dedicated to ensuring the highest quality of code through thorough testing and documentation.

Experience

Geminate Consultancy Services   06/2019 - 01/2021
Jr odoo Developer   Ahmedabad

Responsible for developing and customizing Odoo for the Education Management System and performed the following tasks:

Installation and Setup: Install the required Odoo versions (10.0, 11.0, 12.0, 13.0) on the server and configure it for the Education Management System.

Customization: Customize the existing modules or create new ones to match the specific requirements of the education institution. This involves adding or modifying fields, workflows, and user interfaces as per the client's needs.

Reports: Develop custom reports using QWeb templates and generate reports in various formats like XLS (Excel) for sale, purchase, stock, accounting, manufacturing, etc., to provide insights into the institution's operations.

Website Integration: Integrate the Education Management System with the institution's website to allow students to access course details, enrollment, and other relevant information online.

Data Import/Export: Implement data import and export functionality to enable bulk data management and easy data exchange with external systems.

Access Rights and Security: Set up appropriate access rights at the field, model, and menu levels to ensure data security and restrict access to sensitive information based on user roles.

Testing and Quality Assurance: Conduct thorough testing of the system to identify and resolve any bugs or issues before deployment.

Candid Root Solution   02/2021 - 03/2023
Jr odoo Developer   Ahmedabad

I have been involved in multiple Odoo development projects and customizations across various versions.

Bonnon - Pos Receipt Customization - Customized the Point of Sale (POS) Receipt to match specific requirements.

Performed code customization from Odoo version 14.0 to 15.0.

Karv Realty - Developed an e-commerce website for Karv Realty.

Implemented category and property filters to display relevant properties.

Created a pipeline for managing property-related activities.

Saunak - Developed a frontend portal.
Implemented two types of logins: Vendor and Cameraman.

Created a timesheet feature on the front end to manage work hours and details.

BG - Hospital Management System - Developed a "Hospital Management System" for BG.

Included are modules for managing OPD, IPD, doctors, patients, and medicine stock.

Stigah - Developed the front-end side of a project for Stigah.

Created a new survey and implemented survey flow management.

Sfsignsupply - Performed migration from Odoo version 12.0 to 16.0 for sfsignsupply.

Fruit - Developed a system for managing weekly orders and subscription sale orders. Made website-side changes to enhance user experience.

Cats and Dogs - Managed multiple websites in Odoo.

Responsible for handling orders and other relevant tasks.

Self Employed   03/2023 - Present
Sr odoo Developer   Ahmedabad

Customizing and Configuring Odoo: Expertly tailor the Odoo ERP system to meet clients' unique business requirements by modifying existing modules, creating custom modules, and configuring workflows to optimize processes.

Integrating Third-Party Systems: Seamlessly integrate external systems like payment gateways, shipping providers, and databases with Odoo to enable smooth data exchange and enhance system capabilities.

Database Management: Proficiently manage the Odoo database, ensuring data integrity, conducting data migration, and implementing regular backups and maintenance tasks.

Front-End and Back-End Development: Adeptly worked on both front-end and back-end development to implement innovative features and functionalities in Odoo, enhancing the user experience and system performance.

Bug Fixing and Troubleshooting: Swiftly identify and resolve issues and bugs within the Odoo system to ensure uninterrupted and efficient system operation.

Testing and Quality Assurance: Diligently conduct comprehensive testing and quality assurance to validate the functionality and reliability of developed modules, ensuring they meet specified requirements.

Documentation: Maintain clear and detailed documentation of the development process, code changes, and configuration settings, facilitating future maintenance and upgrades.

Version Upgrades and Module Migration: Skillfully assist in upgrading Odoo versions and seamlessly migrate custom modules and configurations to ensure the system remains up-to-date and optimized.

Performance Optimization: Implement performance optimization techniques, identifying and resolving bottlenecks in the Odoo ERP system to enhance overall efficiency and user satisfaction.
