

CARE GUIDE

Please see below for cleaning & care advice to keep your ModernLIFE Shutters in tip top shape.

Over time your Shutters will collect a layer of dust. Regular dusting of the louvres with a soft damp cloth or microfibre brush will remove this.

Should your Shutters be exposed to a spillage, ensure you remove the spill from the Shutter as soon as possible to avoid staining. Once removed wipe the Shutter over with a soft damp cloth.

If further cleaning is required you should wash the Shutter with a mild, non-abrasive soap (a mild household dishwashing liquid works well), and then wipe the Shutter over with a soft damp cloth to remove any excess soap.

After all cleaning is complete ensure the Shutter is gently wiped over with a dry soft cloth to remove any remaining moisture.

ModernLIFE SHUTTERS made from Advanced Polymer are water resistant, however if they have been installed in a coastal area or a wet area (Bathrooms, Laundry, etc) it is recommended you wipe over the magnets and catches regularly to remove any airborne contaminants that can cause rust or pitting.

(Due to their magnetic properties these components can not be made from Stainless Steel)

Should the hinges on your Shutters become difficult to open it is recommended you apply a food grade silicon spray to reduce friction and binding. Repeat this process regularly for best results.

(Do not use petroleum based lubricants like WD40 and INOX as these will stain your shutters)

Depending on size, the doors of your ModernLIFE Shutter can be quite heavy and are fitted with a nylon bumper on the bottom to ensure the doors sit neatly when closed and allow for a uniform gap at the bottom. Always give the doors a slight lift when closing so this bump stop sits neatly on the bottom frame.

(Always lift doors by the midrail or frame, never lift to close the doors by the louvres)

CAUTION: NEVER use harsh cloths, abrasives, chlorine, ammonia or any other harsh chemicals/cleaners on your Shutters as this will affect the surface appearance by causing scratching, discolouration or peeling of the painted surface.

Following this advice will ensure your ModernLIFE Shutters look as good tomorrow as the day they were installed, and for many years to come.

Thank you for choosing **ModernLIFE SHUTTERS**
