# THE NEW TRUBLOCKOUT SYSTEM. DESIGNED AND TESTED IN AUSTRALIA FOR **ZERO LIGHT LEAKAGE AND A BETTER NIGHT SLEEP.**

## Benefits of sleeping in a dark room

Darkness promotes deeper and more restorative sleep, whereas light exposure during sleep can reduce the production of Melatonin, a hormone that regulates sleep-wake cycles. By sleeping in a dark room, you support optimal Melatonin levels, leading to a better nights sleep.

*"Sleep is the cornerstone of good health. It affects everything from our immune system to our mood, productivity, and overall quality of life."*

Dr Shelby Harris, Clinical Psychologist and Sleep Medicine Specialist

Slimmer pelmets fully concealable within most window frames.

Suitable for large windows with up to 3m drop.

Remote control, Smart phone control, voice control or full integration into your home/office automation system.

Charge via a 240V charge cord or 18V DC battery storage pack to the bottom of the frame. No reaching up.

# INNOVATION NOT IMMITATION.

## THE NEW BLOCKOUT BLIND STANDARD FOR AUSTRALIA.

**TruBlockout is a revolutionary new block out blind system that delivers 100% black out and sets the new standard for block out blind applications.**

TruBlockout incorporates an exclusive 100% block out fire rated fabric, as well as a frame and channel structure designed for zero light leakage on imperfectly square window frames.

Its application is designed for residential style and aesthetics for bedrooms, child nursery rooms and home theatre rooms, yet robustly engineered to withstand high usage commercial applications such as hospital rooms, hotel & apartment rooms, office and boardrooms.

### Key features include:

**Improved Sleep Quality:** 100% black out for a better sleep. Especially beneficial for shift workers or people living in areas with prolonged daylight hours.

**Privacy:** Prevent people from seeing into your home day or night.

**Accessible Charging:** The charging port is positioned at the base of the frame, eliminating the need to reach up and

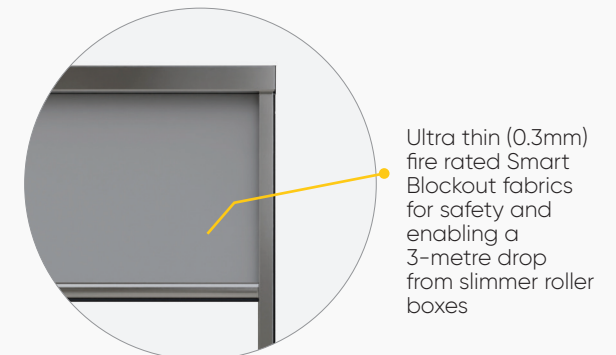

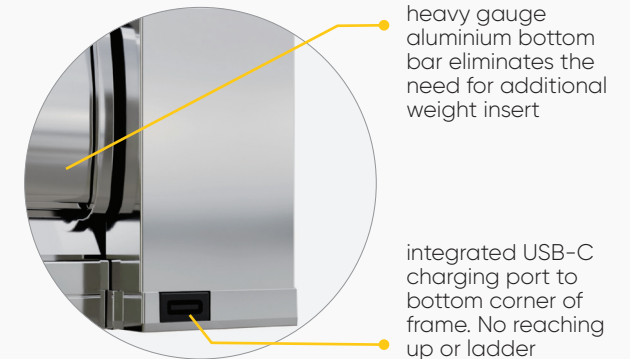

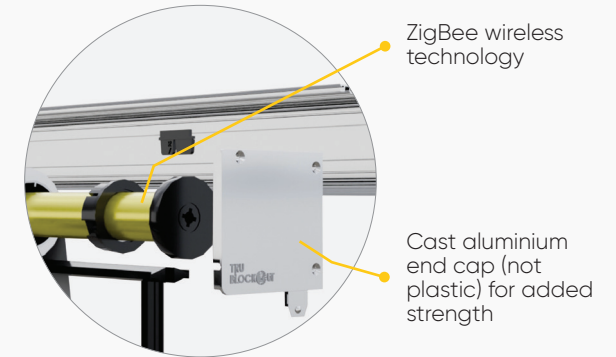

connect the charging cord to the motor or open a Pelmet cover.

**Enhanced Durability:** Aluminium extrusions finished with scratch-resistant power coating to maintain a pristine appearance over time.

**Performance Series Fabric:** Exclusively designed for TruBlockout, Smart Block fabric is lightweight, ultra thin and a perfectly balanced drape enabling a 3-metre drop from slimmer roller boxes.

**Safety:** Compliance to Oeko-Tex standard 100 ensures the Smart Block fabric has no harmful substances, is odourless, eco friendly and child safe.

**Fire Rated:** Smart Block fabric is tested to AS1530 part 2 and 3, and FR rated to self-extinguishing level. In the event of fire, it can help mitigate fire spread, damage to furnishings, equipment, and other valuables.

# TRUBLOCKOUT COLOUR AND STYLE OPTIONS.

## TOTAL PERFORMANCE WITH SLEEK DESIGNER LOOKS.

### 100% block out fabrics

Despite being thinner than the competition for a slimmer, sleeker blind design, the fabric choices available in the TruBlockout System offer total black out of light.

The perfect solution for shift workers, infant nursery rooms and Home Theatre rooms!

TruBlockout delivers 100% black. For young families and shift workers that's perfect – but it's not the only advantage TruBlockout delivers for Australian homeowners:

- Motorisation as standard
- Remote control included
- Suitable for App and Smart Home Control
- Easy charging, no reaching up
- Sleek and flush fitting design
- No messy cords or wand

### TruBlockout frame and fabric colour options

TruBlockout frames are available in Black and White. We can also match our powder coating to any Dulux powder coat colour to suit your design ideas.

TruBlockout's exclusive, slim fabric blocks 100% of light and is available in Charcoal, White, Ivory and Light Grey.
